Perry W. Pratt Nominee of Conservatives

P. W. Pratt, local businessman was the unanimous choice of the Conservative convention held in Lacombe on Thursday to lead the fortunes of their party in the Lacombe constituency. In thanking the gathering Mr. Pratt said the Convention was the culmination of the party's activities during the year and he gave a resume of the work accomplished. Constant repetition of Conservative Policies, he felt would create a psychology in the mind of the public in favor of Conservative interests. D. M. Duggan, Conservative Leader, congratulated the convention on its choice of a candidate and urged the members to give Mr. Pratt every possible assistance in his campaign. Political sentiment had changed tremendously in the province during the last six months, said Mr. Duggan and he believed that in the next election more importance would be attached to the man than to the party. The Conservatives were therefore picking the best men available for candidates. Vote catching, he said, is not the primary concern of the party, but but what can be done as a Government in the house—within the limitation of their powers—toward placing the province in a sound credit position and solving agricultural problems. Two conferences, one in Calgary and one in Edmonton, of the candidates and House members, are being planned to discuss the major problems of the province and possible solutions.

W. E. Payne, member for Red Deer, also spoke on the policy of the party and the need of broadness of vision, ability and energy to deal with the difficulties of the present day.

F. E. McLeod presided as chairman of the convention and the following committees were appointed: Credentials, Marshall Douglas, W. S. Swanson, W. F. Pringle; Resolutions, J. N. B. MacDonald, E. L. Reynolds, L. Oulton, W. R. Porter, Mrs. G. P. Johnston.

Resolution expressing disapproval of the policy of the present government in placing men, women and children from cities, inexperienced in farming, on homesteads in outlying districts, placing unbearable burdens on the homesteaders already settled there; and one disapproving of the unbusinesslike management of the Alberta Telephone system were passed. Others gave approval of the activity of the Federal Government in encouraging tourist traffic, and the appointment of the Royal Commission to investigate price spread and mass buying; and one expressed complete confidence in the Rt. Hon. R. B. Bennett and Hon. Mr. Duggan and the Conservative group in the House.

Officers of the local Association are: President, H. A. Brownlow, Bentley; Vice-President, J. S. McCormick; D. F. Chisholm, Secretary. The above, together with E. L. Reynolds, P. W. Pratt and L. Oulton, compose the executive.

Mr. Perry W. Pratt, the unanimous choice as standard bearer at the Conservative Convention last week needs no introduction to the citizens of Lacombe and District. Mr. Pratt came to Lacombe from B.C. in 1919 and established his automobile business and has operated the same successfully ever since. He has always taken a deep interest in politics, and in 1926 unsuccessfully contested this constituency against the Hon. Irene Parlby. He was a member of our town council for six years, four as councilor and two as mayor, and did splendid work in his department of Public Works.

THE BENEFIT CONCERT

With only a couple of days yet to sell tickets for this concert, the committee in charge makes this final appeal. Buy your ticket today and help this most worthy enterprise along. To date the response of the people of the town and district has been most encouraging and a considerable amount of money has been subscribed—but a lot more is needed. All money realized from the affair will be used exclusively to assist the needy families of town and district this Christmas and to make certain that there will not be even one empty stocking here on Christmas morning. Your money is urgently needed now. Don't wait any longer, get your ticket right today.

A wonderful evening of entertainment has been arranged, with the leading local musicians taking part. Among those who will take part are: Mr. and Mrs. Thos. Wilkes, who will both sing solos; Mrs. Chretien, who will also sing a solo; Mrs. Murphy will have the children from her Kindergarten present to entertain with songs, recitations, drills, etc., which should prove very entertaining; the Canadian Junior College are assisting with some of their musical talent. The young Frizzell boys will feature in mouthorgan solos and duets; Mr. Bob Rhind is on the program and will sing a bass solo or two; Miss Brenna Reed will play a piano solo; there will also be quartettes, recitations, readings, etc., and the evening of entertainment will end with the singing of Christmas Carols, all the musical talent present to take part.

It will be a real concert, and all for 25c. And besides, think of the happiness that the money raised will bring. **Buy Your Ticket Now---Remember, the concert is on Monday, next, December 17.**

CONSERVATIVE CONVENTION SPEAKERS ENTERTAINED

Mrs. G. P. Johnston, President of the Lacombe Conservative Women's Club, entertained Convention speakers, candidates, and others members, at her home following the evening public meeting, at her home following the evening public meeting. Informally social, and with a bit of delightful music, this pleasant interlude was much enjoyed. Refreshments were served by Miss Thelma Kingsbury and Miss Isabelle Johnston. Present were, Hon. D. M. Duggan, J. A. Buchanan, Organizer, and Mr. Foulks, Edmonton; W. E. Payne, member for Red Deer, A. Stonehouse, Innisfail; Nominee P. W. Pratt, Candidate for Lacombe. H. Brownlow, President of the local Association; Mrs. P. W. Pratt, Secretary; Mrs. D. Gilmour, Vice President; Mrs. H. E. Carruthers and Mrs. W. Butlin of the Women's Club.

AN ACCEPTABLE GIFT

One Christmas gift that anyone is sure to appreciate is a Savings Account at The Royal Bank, presented in a pass book with special Christmas cover. You can arrange this now at any branch of the Bank, for any amount and for any person—a friend, an employee or a member of your family.

LACOMBE BRANCH . . C. D. MARBLE, Manager

John May Is U.F.A. Choice

At the Nominating Convention held here on Tuesday, Mr. John May, prominent farmer of the Chigwell District was nominated to contest the constituency in the U.F.A. interests. There was a very large attendance, and several names were before the convention: Alfred Haarstad, of Bentley; R. Huskins, of Clive; John May, of Chigwell, and Chas. R. Abbott, of Lacombe. On the third ballot, the choice was between R. Huskins and J. May, Mr. May securing the majority vote.

In the evening Church Hall was crowded to capacity on the occasion of a meeting addressed by Premier Reid, and others.

Full account next week.

RIMBEY NEWS

The council of Blindman M.D., held its regular monthly meeting on Saturday. Winding up of the year's business occupied most of the program and a resolution was passed authorizing a tax sale as early in the new year as the completion of formalities in its connection would permit.

A party of government surveyors were at work on the Rimbey-Bentley highway, staking out the right-of-way, on Thursday of last week. Work will begin as early as possible in the Spring. It is rumored that Mr. Adolph Hulpin of Lacombe suggests marking all of the turns with Mae West's picture—"dangerous curves."

The Rimbey Board of Trade held its regular meeting in the united Church club rooms. General satisfaction was expressed at the successful termination of negotiations re the gravel road. Mr. W. J. Good and the Rev. G. D. Young were appointed a committee to co-operate with Mr. T. A. Iddings in an effort to have a rural telephone line installed from the south and west country with the subscribers forming a joint stock company.

On Tuesday night the Rimbey Legion met in the Memorial Hall and elected officers for the ensuing year. In addition to an executive the following officers were elected: Mr. H. M. Taylor, President; Mr. L. S. Cutler, President; Mr. T. G. Wilton, 1st Vice-President; Mr. John Barwick, 2nd Vice-President and Mr. W. J. Good, Sec-Treas. A series Whist Driveswill be held during the winter months.

Wednesday evening in Rimbey was a busy night with three business meetings in session. The lady curlers met in the Roper store building and formed four rinks with the following as skips: Mrs. A. Franklin, Mrs. C. J. Hewitt, Mrs. L. Cutler and Mrs. P. Chapman. Mrs. Franklin was chosen as president. The ladies will have the use of the ice on afternoons and on Wednesday evenings. The fee was set at $3.50. The skips for the men's rinks were also chosen at a meeting held in United Church club rooms. Eight rinks will be formed and the fees were set at $6.50. Thos. Wright is in charge of the ice. The third meeting for the same evening was for re-organization of the St. John's Ambulance classes in first aid.

Thursday night saw a big crowd in town; Sharp's circuit show drawing its usual attendance with a queue a block long waiting for admittance.

Thursday afternoon was the day devoted to business meetings of the W.A. of the Church of the Epiphany and the Ladies' Aid of the United Church. Mrs. A. Franklin and Mrs. E. Sisty were the respective hostesses.

Friday night saw Rimbey the mecca for fight fans from all over central Alberta. Some coming from as far south as Calgary and High River. One party came from Brant—in fact the only town not well represented was Lacombe. Promoters were reminded of a similar occasion a few year back when they paid the railway company $50.00 to run a special train out from Lacombe for a boxing bout in Rimbey. When the "special" pulled in only one passenger got off—he was a commercial traveller and after finishing his business in town went to the hotel, and retired without seeing fight. In view of the fact that most bouts put on in Lacombe have been attended by as many as forty to fifty people from Rimbey and district—it is to be hoped that the coming of the proposed gravel road will make it easier for Lacombe to return the compliment.

A dance held in the Chapel school for the benefit of the new community hall now in the process of erection at Forshee was well attended. Huseby's orchestra furnished the music and the receipts amount to well over the thirty dollars. It is hoped that the new hall will be ready for use by the New Year.

A. J. Trussell spent last week-end in Edmonton.

BENEFIT DANCE

It is indeed gratifying to the sponsors of the Benefit Dance that the response to this year's appeal has been so spontaneous. Below you will see the nice amount already subscribed. Last year the total amount subscribed was over $100.00 and it is the hope of the sponsors that this amount will again be raised. As the dance is just one week from tomorrow night a lot more tickets must be sold to reach the above objective. If you have not secured your ticket, get it right now and help this most worthy enterprise along.

Mayor Edwin H. Jones, will open this great event, and voices his approval of the enterprise.

In times like these its a great relief to know that there is a hundred dollars or so on hand at Central Relief headquarters to provide for any emergent cases that may arise. Help this fund along. Buy a ticket. The ticket sellers are busy now—encourage them with your support. If you are out of town, send your money in and a ticket will be mailed to you and your name, with the amount you have subscribed will appear in the paper. If you live in town and do not find it convenient to come and get your ticket, just phone The Western Globe or the Adelphi Hotel and tickets will be delivered to you.

Mr. A. T. Inskip and the staff of the Adelphi Hotel, will have everything nice and comfortable for the dancers and spectators. Card tables will be in readiness for those who do not wish to dance, so if you do not dance, come anyway and play cards and listen to the music.

Bob Paulsen and his popular dance band have donated their services and will keep you stepping lively.

Get your ticket now. Remember there is a cash prize of $5.00 given to the holder of the lucky ticket.

Those who have bought tickets since last week appear below.

Lacombe, Alberta, Dec. 5, 1934
Opal Danner,
Secretary-Treasurer

To whom it may concern:

I hereby certify that I have examined the accounts of the Central Relief Committee for the year or season of 1933-1934. Deposits amounting to $270.31 covering receipts to date appear in the passbook of the Committee at the Royal Bank of Canada.

I have checked each disbursement with the accounts on file, which have been authorized by the executive officers. These amount to $212.80, leaving a balance on hand as per bank pass book of $57.51.

Dated this 5th day of Dec., 19344.

G. T. Jackson, Auditor

DEATH OF BABY HUNT

The sympathy of their many friends is extended to Mr. and Mrs. Ed. Hunt in the death of their young son, Donald Alfred, which occurred on Friday last, after a very short illness. The baby was only 18 months old, and his untimely demise was a very great shock to his parents. The funeral was held on Sunday last, services being conducted at the home of Mr. Peter Huseby, Rev. F. Matthews officiating. Friends to the number of a hundred attended the funeral. Interment was made in Gull Lake cemetery.

WOMEN'S INSTITUTE

Reports of the year's work received at the annual meeting of the W.I., held at the home of Mrs. C. E. Todd on Saturday, Dec. 1st, showed much accomplished along Educational and Child Welfare and Public Health lines. Lectere and talks by Dr. G. M. Little, had given valuable information and the work of other Departments had given the members a wide-spread interest in many topics of the day. Arrangements have been made to sponsor an Art Exhibit, sent out by the University, at the Lacombe School, on Friday, Dec. 14th.

Officers were elected as follows: President, Mrs. W. Teward; Vice-President, Mrs. J. Sherrer; Sec.-Treas, Mrs. W. Clarke; Directors: Mrs. R. Saunders, Mrs. T. Roberts, Mrs. R. Millard, Mrs. R. Watson, Mrs. Dunphy; Department Convenors, Social: Mrs. H. Howe; Assistants, Mrs. A. Jenkins and Mrs. Millard; Education, Mrs. J. Sherrer; Legislation, Mrs. S. Mutch; Canadianization, Mrs. D. Thompson; Home Economics, Mrs. R. Hoppus; Agriculture, Mrs. A. French; Canadian Industries, Mrs. J. Crudgen; League of Nations, Mrs. A. Vaughan; Child Welfare, Mrs. C. E. Todd. Auditors, Mrs. Ray Saunders and Mrs. Todd.

HOBO SOCIAL

A novel social evening, called a "Hobo Party" was held by the C.G.I.T. groups in Lacombe on Tuesday evening last week. The girls dressed in all sorts of fancy hobo' costumes, met in various parts of the Town, and then repaired to the "Jungles" (Church Hall) singing their hobo songs.

Reaching the jungles, various girls gave talks on "The Advantages of Being Dirty," "The Advantages of Sleeping In," and "The Advantages of Not Working." A hobo King was chosen and a parade held and games indulged in. For refreshments a bread line was formed and a most un-hobo-like repast partaken of. After singing their hobo song, the girls dispersed.

ST. ANDREW'S GUILD

Mrs. R. L. Ramsay, was elected as President of St. Andrew's Ladies' Guild at their annual meeting held on Wednesday at the Manse. Other offices elected were: 1st Vice-President, Mrs. Geo. Vickers; 2nd Vice-President, Mrs. S. Pillman; Secretary, Mrs. G. E. Delong; Treasurer, Mrs. F. D. Locke; Church Hall Supervisor, Mrs. John Gilmour; Convenors: Banquet Tables and Decorations, Mrs. A. M. Campbell and Mrs. J. Fraser; Tea, Refreshments: Mrs. G. P. Johnston and Mrs. F. E. McLeod; Banquet Refreshments, Mrs. D. Hay and Mrs. H. Tesare; Kitchen, Mrs. A. French and Mrs. W. Teward; Guild Refreshments, Mrs. U. E. Reeves; Sick Committee, Mrs. S. Pillman, Mrs. R. B. Layton and Mrs. W. Teward. Reports of the year's work will be brought in at the January meeting.

COMMERCIAL COURSE DEBATED

The inauguration of Commercial course in the Lacombe School, continues to be a live question with the School Board. During the past year much investigation has been made and information gathered, which the Board hopes may result in the inauguration of a business course during the next term. Great improvement has also been made in the school room lighting system, which previously had one bulb in the centre of the ceiling of each room. The new system includes four lights from the ceiling arranged in a large, square, which insures comfortable light to all.

BENTLEY-RIMBEY HIGHWAY

The Government has sanctioned and is prepared to take over the road from Bentley to Rimbey as a Provincial responsibility and work will commence as early in the Spring as weather conditions will permit, was the text of a letter from Premier R. G. Reid, read at the quarterly meeting of the Lacombe Board of Trade, last week. Mr. Reid also states it is their intension to locate this road so as to serve the main highway artery to the settlement northerly and westerly from Bentley, and the trend of which will follow in a general way the Lacombe and Blindman Valley Railway. This news received the hearty approbation of the Board, as this road will then connect with the gravel at Bentley, giving access to both North and South through Lacombe, as well as with the highway running East to Coronation, which in time will be completed to the boundary at Compeer.

Remember the Benefit Concert in United Church, Monday, Dec. 17.

POULTRYMEN MEET

A nightlettergram to the Deputy Minister of Agriculture expressing unanimous approval of the Poultry Marketing Act and urging that it be passed as quickly as possible, was the text of a resolution passed by the Lacombe Accredited Flocks Association at their annual meeting held in Lacombe on Wednesday, Dec. 5th. J. Tees, Vice-President was in the chair. Election of officers resulted as follows: President, W. C. Johnson, Clive; Vice-President, J. Tees, Tees; Secretary-Treasurer, W. H. Gilday, Lacombe; Director, C. Williams, Clive. Secretary was acted to write some of the better Hatcheries asking for their prices, etc., covering hatching eggs, and a special meeting is to be called in January to make such arrangements as will meet with the approval of the Association members.

Decision was reached to meet quarterly, the first quarterly meeting to be called on the first Friday in March, and subsequent meetings to be on the first Friday of the quarter.

WORLD HAPPENINGS BRIEFLY TOLD

Lieutenant-Governor Herbert A. Bruce of Ontario has been elected to the board of the Dominion Bank.

Robert W. Babson, statistical expert, advocates a coalition government in the United States beginning in 1937.

The Soviet Union whose position as world's second largest pig iron producer recently was announced, contracted with Japan to sell 40,000 tons of this product.

"Given similar jurisdiction, namely, monetary and customs control, British Columbia is in a better financial position than the Dominion of Canada," Premier T. D. Pattullo declared in a public address.

Prompt construction of two giant airships, an aircraft carrier and a "flying deck" cruiser unlike any other ship now afloat has been proposed privately to President Roosevelt's aviation commission.

Dr. A. L. McNabb, director of the Ontario health laboratories in Toronto, revealed he had succeeded in isolating tularaemia germs infecting a human being. He said he believed it was the first time such an isolation had been achieved in Canada.

Germany is dickering to induce the major powers to legalize her rearmament so she may re-enter the community of nations before a mutual assistance league is formed against her, French political commentators said.

The French Academy of Science awarded a prize of 3,500 francs to Irene Joliot-Curie, whose parents gave radium to the world, and Dr. Frederic Joliot, her husband, for the creation of new radioactive substances which they hope will substitute for radium in the treatment of human ills.

Big Business For Barbers

Dislike Of Mussolini For Whiskers Results In Many Shaves In Italy

The beard fad was approaching an abrupt end in Italy recently as a result of Il Duce's suddenly expressed dislike for such facial appendages. Business was booming for barbers as Fascists streamed into their shops to have their whiskers shorn off.

It was all said to have started when Mussolini, who is always clean shaven told General Attilio Teruzzi, commander of the black shirt militia, that his beard was getting gray.

"You are no longer a lion," he was reported to have told the general. "You are old, and your whiskers are getting gray. You had better have them off."

Almost As Dark

In a negro school near Deanville, Virginia, there was one boy so black that the other pupils called him "Midnight." This comes to us rather straight from a traveller who has just motored through that part of Virginia. It seems that this was all very well until a new pupil only a few shades lighter than "Midnight" entered school. On being called his nickname "Midnight" by the new pupil, the black one answered:

"Listen heah! Don' yo' call me no Midnight. Yo's 'bout half-past 'leven yo' self."

Seventeen of every 20 road accidents are due to human error of judgment, while in two out of every three lack of care or thought on the part of the victim is the principal cause.

The total number of live cattle exported to the British Isles in 1934 up to October 25 was 44,138, compared with 43,792 in the corresponding period of 1933.

Ask Mother— She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was nervous and rundown . . . kept her on the job all through the Change. No wonder she recommends it.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Recipes For This Week

(By Betty Barclay)

MARVEL LEMON PIE

1 package lemon-flavored gelatin
¾ cup sugar
¼ teaspoon salt
1 tablespoon grated lemon rind
6 tablespoons lemon juice
1¾ cups boiling water
2 egg yolks
1 baked 9-inch pie shell

Combine gelatin, sugar, salt, and lemon rind with 3 tablespoons water. Add egg yolks and stir well. Add remaining water, stirring until gelatin is dissolved. Cool. Add lemon juice. Chill. When slightly thickened, turn into cold pie shell. Chill until firm. Cover with whipped cream.

CELERY CROQUETTES

2½ cups celery cut fine
½ cup milk
1½ tablespoons flour
1½ tablespoons butter
1 teaspoon sugar
1 egg yolk
Salt and pepper
Crumbs and egg

Cook the celery in boiling salted water to which has been added the sugar. Drain very thoroughly. Make a white sauce of the milk, flour and butter. Season with salt and pepper. Add the celery and the slightly beaten egg yolk to the sauce. Mix well. Spread on a plate to cool. Form into small croquettes. Dip in crumbs, egg and crumbs again. Fry in deep fat. Drain.

Tested Eczema Remedy

Is Prescription of Doctor

Your skin trouble—whether it is eczema, acne, hives, dandruff, ringworm infection or pimples and blotches—will be positively benefitted by D.D.D., because D.D.D. is a tried and tested Physician's Prescription. CUNNING WEE WASHING FROCK FOR TINY TOTS WHO LOVE TO ROMP AND PLAY

Just easy-to-handle plaits and slightly shaped neck bands mark this adorable little frock. The plaits are deep enough to fall easily and quickly into position when the need for pressing comes along.

The nautical theme carried out this cute dress in navy blue linen with white neck and sleeve bands with bright red accent in the amusing ship and in the string tie.

However, in red, white and blue Scotch plaided gingham, it is also exceedingly effective.

It costs but a trifle to copy this simple to make dress.

Style No. 890 is designed for sizes 2, 4 and 6 years. Size 4 requires 1¾ yards of 39-inch material with ⅜ yard of 35-inch contrasting and 1 yard of 1-inch ribbon for bow.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Chinese Farmers Lose Heavily

Losses to Chinese farmers and peasants occasioned by the prolonged drought and record heat wave of the past spring and summer are expected to exceed $1,200,000,000, according to a report issued by the National Famine Relief Commission, based on reports received from the stricken districts.

It takes plant breeders 12 to 15 years to select, test and prove a new variety of grain.

Little Journeys In Science

BACTERIA

(By Gordon H. Guest, M.A.)

When the microscope was invented a new field of science known as bacteriology, was opened up. Bacteria is the name given to a large group of plant organisms of minute size. Some of these have a rod-like appearance, some are spherical, and some look like trailing bits of filament. The rod-like type are called bacilli, and it requires twenty-five thousand of them placed end to end to occupy one inch of space.

Bacteria reproduce by the division of their bodies, one rod or sphere changing with great rapidity into two. The bacilli which bring about the fermentation of hay, double their length and divides every half hour.

Many kinds of bacteria are killed by heat, while others cannot withstand great extremes of heat and cold. A few varieties, however, exist in a dormant state at 222 degrees below zero. A temperature of 87 degrees above zero destroys most bacteria, but some are known to live in hot springs where the temperature is 104 decrees.

Because they are plants, bacteria have no stomachs, and so they cannot absorb undigested food. They therefore go into their food. When they have penetrated into the material which they are going to use for food, they give off chemicals which change the material into a form in which it can be absorbed. Thus bacteria bring about the decomposition of dead plants and animals. Slowly but surely the bacteria bring about complete decomposition of the dead matter into many compounds, including such important substances as carbon dioxide and ammonia. If it were not for this process of destruction all living things on the earth would soon perish, because the chemical elements upon which life depends would be locked up in dead plants and animals. Thus the chemical elements necessary to life are always travelling in a circle. Everything come from the earth, returns to the earth and is used over and over again. If the circle is ever broken all life would stop. Bacteria play an important part in keeping this vital circle unbroken.

A Product Of Proved Merit

Vicks Va-tro-nol. For Preventing "Colds, Meets With Wonderful Success

Windsor, Ont.—An intensive newspaper advertising campaign introducing Vicks Va-tro-nol, the new aid in preventing colds, has just started in Western Canada. Introduced in Ontario last year, and in the United States two years before, Va-tro-nol immediately became immensely popular.

Newspapers were selected as the principal medium for the introduction of Va-tro-nol because of the excellent results they have produced for Vicks VapoRub, according to the announcement.

For many years VapoRub has been the world's most extensively used cold remedy—the family standby for treating colds in 68 countries. Vick officials attribute much of the tremendous VapoRub sales—over 26,000,000 jars last year—to honest consistent newspaper advertising, backing a product of proved merit.

Similar international success is being achieved now by Vicks Va-tro-nol—companion to VapoRub in Vicks Plan for Better Control of Colds. Vick Chemists and medical consultants developed the formula for Vicks Va-tro-nol after years of clinical research. It is especially designed for nose and throat, where most colds start.

Based on a new idea for preventing colds—by aiding Nature's own cold-fighting functions in the nose—Va-tro-nol is introduced as "the ideal companion to Vicks VapoRub, the modern external method of treating colds." Together with certain simple rules of health, these two preparations form Vicks Plan for Better Control of Colds. Records of thousands of clinical tests—conducted over a period of two years under medical supervision—indicate that Vicks Plan greatly reduced the number, duration and dangers of colds.

In accordance with the Vick Company's policy for nearly 30 years, VapoRub and Va-tro-nol will be heavily advertised in newspapers throughout the season. They will also be backed by the distribution of thousands of samples through drug stores in the Dominion.

Since 1929, Vicks has steadily increased its advertising while other companies were drastically curtailing theirs or eliminating it entirely. And during these five turbulent years, sales of Vick products have increased from 26,000,000 to over 53,000,000 packages annually, despite adverse business conditions.

One Phone Serves Village

Fire Bell Gives Alarm Whenever Call Comes Through

To make the only telephone in a Derbyshire village of England efficient a fire bell has been installed outside the post office, home of the instrument. Whenever a call comes from the outside world the fire bell gives the alarm. At least half a dozen villagers rush to the phone and either take the call themselves or find the individual for whom it was intended. Every child in the village has been instructed how to use the telephone.

Passenger and freight receipts of government railways in Japan are much greater than a year ago.

It takes surprisingly little to support a family of five, if you're doing it with a paper and pencil.

CHRISTMAS CAKE—Christmas dinner . . . a monster turkey, nuts, candies, paper hats which come from the gaily colored Christmas crackers—and to bring to a conclusion the year's greatest feast—a Christmas Pudding and a Christmas Cake made from PURITY FLOUR. You'll appreciate the high quality, the absolute uniformity of PURITY FLOUR in the season of Christmas baking. It's best for all kinds of baking. All baking made with it is marked by a distinctive, pleasing flavor, an even texture, good color and the other qualities which fill the housewife's heart with pride. Buy a bag today from your grocer, and keep only one brand of flour in your kitchen.

PURITY FLOUR
BEST FOR ALL YOUR BAKING

A Great Achievement

But Winners Of Air Race Could Not Praise Trip

"Black was liverish all the way from Singapore, and we quarrelled all the way . . . It was a lousy trip, and that's praising it."

A Roman hero, acknowledging his laurels and his triumph, would not have said it thus. Nor would an Elizabethan adventurer, returned from conquering new worlds to accept the boon of Gloriana's smile and the acclaim of England.

But to every age its vocabulary. Thus did C. W. Scott, new-landed with his fellow-pilot, T. Campbell Black, acknowledge the cheering of the throngs that welcomed the victors of the London-Melbourne flight.

"It was a lousy trip and that's praising it."

Though "a lousy trip" it was a great achievement. The time, 71 hours 18 seconds, bettered the London-Australia record, made a year ago by Captain C. P. T. Ulm by more than three and a half days. The speed, over the whole distance of 11,323 miles, averaged higher than two miles and a half a minute. The last 2,000 miles, the most perilous of the journey, were made with one engine "folded up," and in spite of all the odds that bad weather could pile up against a crippled plane and strained and exhausted men.

For reckless daring and stubborn courage the story of the last twenty-four hours of the "lousy trip" to Melbourne cannot be bettered by any Roman historian or Elizabethan chronicler.—Toronto Globe.

Television For Germany

"Conversations" Will Be Possible At 400 Mile Distance

Television equipment is to be installed by Post Officials of Germany in special telephone booths in the larger cities of the country, "Conversations" will shortly be possible at a distance of 400 miles. The two conferring parties arrange a definite appointment and go at the appointed time to the telegraph offices in their respective cities. They are shown into a special box and take their seats in comfortable armchairs. Powerful arc-lamps are turned on. As soon as the warning, "You are through," comes from the telephone operator, the television apparatus is switched on automatically, and "A" may start to address the head and shoulders of "B," which appear to him on a screen on the side of the television box. Simultaneously the portrait of "A" is switched on the screen in "B's" box.

Canadian Education Association

Officers And Directors Are Elected For The Ensuing Year

Dr. George F. Rogers, Ontario director of education, was elected president of the Canadian Education Association for a two-year term. He succeeds H. H. Shaw, superintendent of education for Prince Edward Island.

The association elected honorary presidents, minister of education for all the provinces of the Dominion. Other executive officers are: Vice-president, Dr. H. H. Munro, Nova Scotia superintendent of education; secretary-treasurer, W. J. Kerr of the Ontario department of education.

Directors elected include: Dr. S. J. Willis, British Columbia superintendent of education; J. F. McNally, Alberta supervisor of schools; Dr. J. H. McKenzie, Saskatchewan deputy minister of education.

As a result of over ten years' effort in the direction of strawberry breeding at the Dominion Central Experimental Farm, Ottawa, thirty varieties of new hybrid strawberries, selected for earliness, lateness, productivity, and general health and vigour, have been named. The distribution of these varieties was commenced in 1933.

Wife: "Do you remember that doctor who ten years ago gave me only three months to live?"

Husband: "Yes. A nice man, but you couldn't really rely on him."

Leek is the national symbol of Wales; the Welsh wear it in their hats on St. David's Day.

Fear Is Unnecessary

Leprosy Is Less Contagious Than Tuberculosis States Doctor

Leprosy is not the highly contagious disease the public believes it to be, according to Dr. R. G. Cochrane, secretary of the British Empire Leprosy Relief Association.

"Leprosy," the physician said on a visit to Port of Spain, "has a reputation it does not deserve. It is less contagious than tuberculosis, and the average layman is far more afraid of this disease than he should be."

This fear, Dr. Cochrane asserted, prevented "a reasonable attitude being adopted toward the disease." Dr. Cochrane, after inspecting the Trinidad leper settlement at Chacachacare, said the colony was using the most approved methods of dealing with the disease. He planned to inspect leper treatment facilities in other Caribbean colonies before proceeding to Canada.

Used Carrier Pigeons

Chinese Caught Smuggling Narcotics From Cardiff To London

The use of carrier pigeons to transport illegal narcotics from Cardiff to London and other English cities was disclosed with the conviction of Jou Ling Sam, 54, on charges of possessing opium.

The Chinese, who was fined $500 and sentenced to three months' imprisonment, was caught when watchers noticed regular departures of pigeons from an attic window. Several of these birds were captured and attached to each was a small tube containing the forbidden drug.

Although the mineral content of honey is very small, it is worth noting, says the Dominion Apiarist, that such elements as lime and iron, necessary to the well-being of the human body, are present.

Pat: "My brother never met with a disappointment in his life."
Mike: "How's that?"
Pat: "He never looks for anything but trouble."

Great Inventor Dead

Professor James Gordon Gray Aided Britain During War

Professor James Gordon Gray, one of whose many inventions was the inductor compass which assisted Colonel Charles A. Lindbergh in his spectacular transatlantic solo flight, is dead.

Prof. Gray, long recognized as one of the world's most brilliant workers in the field of applied physics, did valuable scientific work for the British and United States governments during the great war, but for years received little public recognition because of the operation of the Official Secrets Act.

The fact that he invented and perfected the gyroscope for aerial and marine purposes during the war was not revealed until later.

The Island Of Luzon

The yen for distant lands was stronger than ever in the minds of several after hearing of the Island of Luzon from Rev. N. H. Paquette, recently returned from the Philippines. There, unemployment is unknown because nobody works hard. Houses can be built for $3. There is no church collection and no prohibition. The reason for this is that missions keep up the church and nobody drinks, the minister said.

League's Policy Negative

The League of Nations instead of being an instrument working for peace has become an institution attempting to prevent war, Eduard Benes, Czech foreign minister, told the chamber of deputies when it reconvened at Praha. In a lengthy expose of the European situation Benes emphasized the league was working along negative lines instead of having a definite positive policy such as it had in the days of Aristide Briand.

Having been mute for more than 100 years the great organ of the Church of St. John Lateran, at Rome, Italy, is being reconstructed for use in the next church festival.

Nobel Literary Prize

Pirandello, Famous Italian Dramatist, Receives Award

Luigi Pirandello, famous Italian dramatist and novelist was awarded the Nobel literary prize. Selected from a host of American and European literary figures, Pirandello was given the famous award, which last year went to Ivan Buin, Russian author, and which normally is worth about $45,000.

Pirandello was born at Girgenti, Sicily, in 1867, and was educated at Rome and the University of Bonn. His present home is in Rome. His writings have been varied, including poetry, plays and prose.

His best known writings include: "As You Desire Me", "Six Characters in Search of an Author", "The Man With the Flower in His Mouth", "The Mock Emperor", "The Life I Gave You".

Smallest Wireless Set

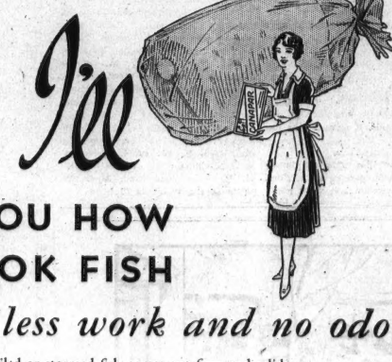

Pencil Radio Said To Provide Very Good Reception

The world's smallest wireless set has just been made in Chicago. It is a tuning coil wrapped round a pencil. The crystal detector is inserted in the metal eraser cap, to which is also attached the standing, pinlike aerial. For use, the pencil radio is simply connected to a pair of earphones. It is said to provide surprisingly good reception, considering its size, and it picks up stations several hundred miles away.

Twelve per cent. of the motor licences issued in England are held by women.

The total amount of branded beef sold in Canada during the month of September was 2,818,400 pounds.

FOR COUGHS Calms Bronchitis Mathieu's Still the best Syrup

TELL YOU HOW TO COOK FISH

—with less work and no odor

Boiled or steamed fish comes out firm and solid, swimming in its own juice, when you cover it with CANAPAR Cookery Parchment. No fishy odor. No gummy steamer or saucepan to clean up afterwards.

And how delicious vegetables are when cooked the CANAPAR way! You can boil *three* in one saucepan without the flavors mixing—over a single burner. Save fuel. Eliminate odor in the house. Preserve the rich mineral salts. Cut down work.

CANAPAR can be used over and over again. It won't absorb odors. Try it as a dish cloth—especially for glasses.

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wildwest outfit.

Dad Kane, desert rat and luckless prospector up now to returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Spike Goddard and Sam Dustin, fearing the old prospector may tell others the things he has seen as to the branding of Carr's cattle, plot to get him to show them the location of the mine and then to kill him.

Gerald Keene, dressed in ridiculous cowboy costume, arrives at the Hour-glass ranch and is hired as a cowboy by Joe Carr. The impersonation of a tenderfoot is successful, and he is accepted as such by the other occupants of the bunkhouse.

(Now Go On With The Story)

CHAPTER V.—Continued

"You see I ain't done much real cowhand work. I was livin' in town and I got me a little bit o' money. I learnt what I could from a few books I read an' then I come West to learn the business. That's how come I was hired. . . ."

"Huh! Year . . . I . . . ! We see . . . ! That's fine. . . ." Baines took in the creaking newness of boots and clothing, the clumsy equipment on the pony and he grinned into his hand. "I see you've got three notches on your gun," he said, with a grin at the others. "Where'd you buy it?"

"I bought it before I started West. All the books said that a notch is cut on the handle for every man who's been killed. . . ."

"Great God all mighty," said Baines, all at once. "You mean you've killed three men? In Chicago with a machine gun I reckon. . . ."

"Nope. I done it with an automobile. . . . I got all three of 'em at once. It was just like killin' quail. They was all settin' when I hit 'em. You see I was coastin' downhill an' the machine swung off the roadside. They was playin' damned careless just like you was when I rode up and they was talkin' a lot o' damn fool talk same as you. . . . So . . . I killed 'em. . . ."

At that even Silent Lee laughed.

"Oh, let him alone," he said, grinning. "You'll get nothing often him."

In this manner did Duro Stone come to the Hour-glass ranch.

The bunk-house did not know that Edith Carr, the pretty, red-headed daughter of old Joe Carr, saw the new arrival. She was mixing a mint julep for old Joe who was sitting in his front office with his game leg straight out before him on a chair when Stone arrived. She promptly took her "makings" into the back-office but was quite close enough to hear what took place.

"I'm hearin' tell you want new men," quoth Stone. "I'm lookin' for a job."

"S'at so?" demanded Carr. "What kind of a job?"

"Mostly eatin' with a little unofficial drinkin' throwed in. I don't mind some ridin' on a nice fambly horse. I kin split wood and haul water an' . . ."

"By God," said Carr, "that's more'n most can do who hire out as cowhands. Know anything about cattle or is that outfit all bought from a catalogue?"

"Not all of it," said Stone, grinning. "I won the spurs in a poker game."

"You're hired. Get back over to the bunk-house and kill the first coyote who tries to play practical jokes on you."

Edith came back into the room giggling. She had never seen any one just like that before.

"Who in the world was that, Daddy?" she asked. "He looks like a walking advertisement for Christmas presents."

"Looks like he'll do for you to play with, Honey, when he ain't workin'. We're sure out of luck when we have to hire men like that. He ought to do to ride fence and leave the other men free for regular work. When Frank Crewe gets back send him in to me, will you, please?"

Edith gave him his julep, nodded her bright head and, picking up her quirt, passed out to the tie-rack where her pony stood. She was young; distinctly more than merely pretty and she dominated every soul on the Hour-glass. As her father watched her go, his face darkened. His bad leg hurt him but other things hurt worse and a little later, when Frank Crewe came in for a chat, he found his boss and old friend in the depths. Crewe did not help matters, for his dark face was darker with wrath where ordinarily it radiated good humor.

"Nothin' good, Joe," he said cryptically. "We've been combin' the back-ranges for a week an' we got maybe four hundred. Not prime stock at that. . . ."

"Four hundred. . . ." Joe Carr's tone registered utter consternation. "The beginnin' of the round-up and only four hundred calves from more'n three thousand cows. . . ."

"Calves, hell. . . ." Crewe exploded. "I'm tellin' you, Joe, this four hundred is all! Git that? It's cows an' calves an' steers an' bulls, too. . . . Breedin' stock an' increase . . ."

Carr tried to rise but sat back with a groan of pain.

"Hell," he finally ejaculated. "That just ain't possible!"

"I know it ain't. And I know, too, where the stuff's gone but I'll be damned if I could either prove it to be our stuff or show how it was stolen. I know those damned robbers over on the Broken Spur are at the bottom of it. I know they sent two thousand head out to California two months ago to fatten for the market and I know they got seventeen dollars where we got eight-fifty. They're glad to ship their cows out o' the State. But we were asleep. We ought to have a man at the loadin' pens."

"I know . . . I know," said old Carr placatingly. "I didn't have a man to send, as you know, and I didn't have the money to hire an extra man. I'd give a lot to pin what I know Dustin is doin' on to his card. But I can't. I wish to God we could find that man Gerald Keene. We've talked him over so damned often that I've got to sort of feel he might do us some kind o' good. I don't know but what he might. . . ."

"Huh. If you could get in touch with him, he might," conceded Crewe. "Somethin's got to turn up. . . ."

"Yeah. Like a hoe-handle when you step on the blade an' knock your fool brains out," said Carr viciously. "I got to borrow money to meet our next pay-roll, Frank. I reckon I'm busted flat. I'm sixty-five past and I've got Edith to take care of. . . . She didn't come till I was past forty, Frank. I got to find some way to take care of her. . . ."

"You needn't worry about her," said Crewe, who openly adored her. "Plenty of men'd be glad to relieve you of that care. Sam Dustin, for instance. . . ."

(To Be Continued)

Successful Canadian Exhibitors

Awarded Good Share Of Prizes At Imperial Fruit Show

Canadian exhibitors were awarded a good share of the awards for apples at the Imperial Fruit Show, wh'ch was held at Leicester, England, this year from November 2 to November 10. British Columbia won seven first prizes, and two seconds, and Nova Scotia was awarded five firsts, three seconds and one third.

In the British Empire section dessert class, open to growers from all parts of the British Empire, James Lowe, of Oyama, B.C., took second prize for his exhibit of Jonathan apples, a variety that is brilliant red in colour, of excellent quality, high flavour and suitable for both dessert and culinary use. The Associated Growers of B.C., took six firsts for boxed apples in the Canadian Championship section; a first and second in the special prize class and the Agents' General Cup. In the barrelled classes in the Canadian Championship Section, H. Thorburn Morris, Port Williams, N.S., won a first in Class 9, and the second and third prizes in this class went to the Borden Fruit Company, Woodside, N.S., and the Banner Fruit Company, Bridgetown, N.S. In Classes 10 and 14 the Wolfville Fruit Company of Wolfville, N.S., won the first prizes and in Class 15 the Borden Fruit Company of Woodside, N.S., was awarded first, and H. Thorburn Morris, second.

Canadian honey also scored well at the show. The Saskatchewan Beekeepers' Association of Regina, took a first and second in Class 8, the third prize in this class going to G. F. Pearcy, Kelowna, B.C. In Class 6, G. F. Roberts of Kelowna, B.C., was awarded first prize, the Saskatchewan Beekeepers' Association second, and G. F. Pearcy, Kelowna, third.

The Imperial Fruit Show is the outstanding event of its kind held annually in the British Isles. At several shows in previous years Canadian exhibitors won the first prize in the dessert apple class with the famous McIntosh Red, which was originated in Matilda Township, Dundas County, Ontario.

Some Queer Gifts

British Statesmen Often Receive Strange Presents From People

Shortly before Sir John Simon retired from the Foreign Office, a box containing a bunch of snowdrops, accompanied by a slip of paper with the words, "From a little Yorkshire girl."

Some statesmen have received even stranger presents. Mr. Winston Churchill was once sent a prayer-mat by some Dundee mill-girls. The anonymous gift of a mangel-wurzel which arrived some years ago for Mr. Lloyd George must have surprised him.

Mr. Stanley Baldwin — a keen smoker—received, when he was prime minister, more gifts than any other member of parliament has ever been sent. They included 8,000 pipes, innumerable tobacco-pouches and many brands of tobacco.

Letters To Be Auctioned

Almost a century and a half after they were written, 318 letters of a "strong man" of another epoch will be sold by auction in London, December 17. They are the letters of Napoleon Bonaparte to the Empress Marie-Louise, all couched in affectionate terms, and revealing that the "strong man" of the 19th century who could lead and destroy large armies had a kindly heart and a definitely sentimental streak in him.

Returns From Abroad

Canada's Central Bank will not be modelled after any particular central bank of Europe, Graham Towers, governor of the Bank of Canada, declared on his arrival at Quebec on the liner Empress of Britain after a trip of nearly two months to England and on the continent.

Honey absorbs moisture from the air and loses aroma and flavour rapidly. Therefore, it should not be left uncovered any longer than is necessary. Extracted honey should be kept in a cool, dry place, but honey in comb should be stored in a warm and dry place.

There are six kinds of lightning—Ball, bead, ribbon, rocket, streak and sheet.

Mothers adopt Vicks Colds-Control Plan

Helps the Whole Family to Enjoy Greater Freedom from Colds

* * *

Doubly welcome to mothers is news that the makers of Vicks VapoRub have perfected a Plan for Better *Control* of Colds—to help reduce the *number, duration* and *dangers* of colds. Vicks Plan is introduced along with Vicks Va-tro-nol, the remarkable new aid in *preventing* colds—companion product to Vicks VapoRub, the modern method of *treating* colds. The Plan includes simple, easy-to-follow rules of health—to build resistance to colds.

TRIAL OFFER BY LOCAL DRUGGISTS

Get these two Vicks products and use them as directed in Vicks Plan for Better Control of Colds. Full details of the Plan are given in each package of Vicks Va-tro-nol and Vicks VapoRub. Unless you are delighted with results, your druggist is authorized to refund your money.

BRIEFLY, HOW VICKS PLAN WORKS:

• TO HELP PREVENT COLDS

At that first stuffy feeling, that first nasal irritation or sneeze, quick!—Vicks Va-tro-nol—just a few drops up each nostril. Especially designed for nose and upper throat—where most colds start—Va-tro-nol stimulates the functions which Nature has provided—in the nose—to *prevent* colds and to throw off colds in their early stages. Used in time, Va-tro-nol helps to avoid many colds entirely.

• TO HELP SHORTEN A COLD

If a cold has already developed, apply Vicks VapoRub at bedtime. VapoRub acts *direct* through the skin like a poultice or plaster, while its medicated vapors—released by body heat—are inhaled *direct* to inflamed air-passages. This *double direct* attack loosens phlegm—soothes irritated membranes—eases difficult breathing—helps break congestion. Often, by morning, the worst of the cold is over.

Teaching People To Live

Matter Of Diet, Sleep And Fresh Air Should Be Studied

How to teach people to live so that they may enjoy health and avoid sickness is a problem that has not been solved. Whether it can be done by education is a question.

Most people prefer to live their own lives according to their own ideas and are inclined to look with contempt on matters of diet, sleep, fresh air, the avoidance of excesses of every kind and restrictions that would interfere in any way with their personal liberty.

Nevertheless it is perfectly true to say that thousands of people have benefited greatly by the information that has been disseminated, with the result that they have been almost totally free from sickness of any serious kind for many years.

THE RHYMING OPTIMIST

By Aline Michaelis

ON WINTER NIGHTS

On winter nights I sit and dream
Beside the glowing fire;
Without, the wind's shrill voices scream,
The snow is drifting higher.
And often when I muse this way
My vagrant fancies wing
Again to youth's unheeding day
When lips seemed made to sing.

When every hour was filled with joy
And every day with sun,
Life's sands were gold without alloy,
Life's mirth was never done.
Yet on this dream grim shadows lie
That darken half its gold:
How thoughtless youth went marching by,
How harsh sometimes, and cold!

On winter nights I muse sometimes
Beside the firelight's glow;
Without, the white moon higher climbs
To gleam on drifted snow,
And paler than the moonlight's beam
Upon the snowflakes tossed,
They stand, the people of my dream,
Whom I have loved and lost.
And then I cross that borderland
Where unseen bars are set,
To say, "At last I understand."
To smile, though eyes are wet.

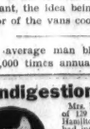

Where Minutes Count

A pneumonia patient should be given emergency treatment as quickly as a man hit by a truck, Dr. Russell L. Cecil of Cornell University told the Oklahoma City clinical conference. Describing pneumonia as an illness where minutes count, Cecil related recent discoveries which have made detection of pneumonia possible within two hours. Previously as long as two days had been required for definite diagnosis, he said.

Lawns of real grass have been put on top of the vans of a Berlin butter merchant, the idea being to keep the interior of the vans cool.

The average man blinks his eyes 94,600,000 times annually.

Indigestion, Gas

Mrs. Elizabeth Stewart of 179 S. Caroline St., Hamilton, Ont., says: "I had indigestion most all the while, and was continually bloated with gas. At times I had heartburn and I would become dizzy - headed frequently, but Dr. Pierce's Golden Medical Discovery built up my system and entirely rid me of the stomach distress. I have had no stomach trouble in years." All druggists. Write Dr. Pierce's Clinic, Buffalo, N. Y.

Little Helps For This Week

"What doth the Lord thy God require of thee but to fear the Lord thy God, to walk in all His ways, to love Him, and to serve Him with all thy heart and soul?" Deuteronomy 10:12.

What asks our Father of His children save
Justice and mercy and humility,
A reasonable service of good deeds,
Pure living tenderness to human needs,
Reverence and trust, and prayer for light to see
The Master's footprints in our daily ways?
No knotted scourge, nor sacrificial knife,
But the calm beauty of an ordered life
Whose every breathing is unworded praise.

—J. G. Whittier.

Give up yourself to God without reserve; in singleness of heart, meeting everything that every day brings forth, as something from God that is to be received and gone through by you in such a heavenly use of it as you would suppose the holy Jesus would have done in such occurrences. This is an attainable degree of perfection.

We ought to measure our actual lot, and to fulfil it, to be with all our strength that which our lot requires and allows. What is beyond it is no calling of ours. How much peace, quiet, confidence and strength would people attain if they would go by this plain rule.—H. E. Manning.

Illicit Traffic In Narcotics

Bulgaria Said To Be Attracting All World's Scoundrels

Drug traffic under investigation at Geneva by the Opium Advisory Committee revealed sensational stories of illicit traffic in opium and narcotics in Bulgaria. Russell Pasha, Chief of the Police in Cairo, said that Bulgaria was the only big source remaining in Europe for the manufacture of narcotics and was therefore attracting all the world's scoundrels. It was stated that Bulgaria imported in 1933 material sufficient for the manufacture of twelve times the legitimate needs of the whole world, whereas in 1930 her imports were insignificant.

Shipments of livestock from Western to Eastern Canada in 1934 up to October 18 included 89,593 cattle; 4,478 calves, 51,134 sheep, and 159,916 hogs. Compared with the corresponding period of 1933, these figures show increases of 24,906 cattle; 2,397 calves, and 15,165 sheep; and a decrease of 77,253 hogs.

A Matter Of Economy

England's Prince of Wales, who in recent years has become probably the most enthusiastic royal aviator in Europe, is reducing his aeroplane "stable". It is understood the royal heir is selling two 'planes to cut down on expense.

Great changes in temperature or exposure to intense sunlight cannot be withstood by snakes.

Even people who can afford it seldom pay their bills on time.

A soft answer may start good luck your way.

How we enjoy a man who has no tale of woe to tell!

Strange Baptismal Ritual

"Old Germanic" Religion Adhered To By Some Families

A strange baptismal ritual used by families adhering to the "Old Germanic" religion is described in the magazine for German folk lore, "Rig".

A stone table is erected amid huge stone blocks, and a bronze hammer and a basin filled with water is placed upon it. The family and the guests assemble round the table at the call of a bugle. After community singing, the mother lays the child at the father's feet. Raising the child after bowing, the father recites these words:

"I recognize thee as my own, and receive thee into our clan. I give thee this name. I lave thee with the clean water of a German well. May it take from thee all that is un-German and alien."

The child is thereupon handed to the godparent, who promises to help and advise the parents always. Lastly a priest ends the ceremony with the words: "In the name of Him who created Himself, we bless thee. May the Almighty dwell in thee!"

Like Canadian Fruit

An increase of approximately 3,000,000 pounds in the exports of Canadian canned fruit during the first half of the current fiscal year compared with last year, reflects the appreciation of world epicures for Canadian fruits, says a report of the department of trade and commerce.

There is no scientific basis for the popular belief that salt, aspirin or baking soda will prolong the life of cut flowers. Flowers will, however, do fairly well if the water is changed regularly and the stems cut daily.

A woman claims to be able to drive home a two-inch nail with a single blow of a hammer. There's reckless driving for you!

Longest All-Concrete Bridge

Crown Prince Of Sweden Attended Opening At Stockholm

The longest all-concrete bridge in the world at Transberg, on the outskirts of Stockholm, Sweden, was opened recently and has been crowded with vehicles since. The Crown Prince of Sweden with many high officials, were present at the ceremony. The estimated cost of building the bridge was 4,800,000 kroner ($1,200,000), but only 4,000,000 kroner was actually required. The bridge, which is one of the sights of Stockholm, is a marvel of modern engineering skill, being built entirely of concrete. Its largest span is about 580 feet, with a breadth of approximately 20 feet. The total length from approach to approach is about 1,512 feet.

To Speed Up Express

Trains On Streamline Plan Being Built In United States

Looking to the day when railroad express shipments may enjoy the same speed now accorded passengers by modern car construction, two full-length express trains on the streamline plan are being built in suburban St. Charles, Mo. It is said that the American Car & Foundry Company, the builders, will have the trains ready for the Baltimore & Ohio Railroad by the first of the coming year. Each train is to consist of eight cars, and the enterprise means jobs for many regular men of the construction company who have been for some time without work.

Katmai national park, Alaska is the site of the "Valley of Ten Thousand Smokes".

The Isle of Man is ten times as big as the Isle of Manhattan.

A new electrically operated gun can shoot 20,000 bullets a minute.

Faster Way Found to Relieve Headaches

NOW PAIN OFTEN RELIEVED IN MINUTES!

Remember the pictures below when you want *fast* relief from pain. Demand and get the method doctors prescribe—*Aspirin*.

Millions have found that *Aspirin* eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

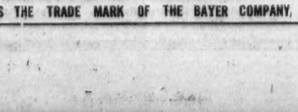

In the stomach as in the glass here, an *Aspirin* tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain practically as soon as you swallow it.

Equally important, *Aspirin* is safe. For scientific tests show this: *Aspirin does not harm the heart.*

Remember these two points: *Aspirin Speed* and *Aspirin Safety*. And, see that you *get* ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every *Aspirin* tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

Drop an Aspirin tablet in a glass of water. Note that BEFORE it touches the bottom, it is disintegrating.

IN 2 SECONDS BY STOP WATCH An Aspirin tablet starts to disintegrate and go to work.

What happens in these glasses happens in your stomach—ASPIRIN tablets start "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures

ASPIRIN IS THE TRADE MARK OF THE BAYER COMPANY, LIMITED

No more RECHARGING OF BATTERIES!

. . . how would you like a battery radio that will do everything that the finest electric set will do? That will bring you the clear, full tone of the finest electric set ever made, day after day without weakening . . . and banish forever the annoyance and expense of recharging batteries? Then—hear the new Air-Cell Radio—the Wonder of the Air!

Air-Cell Radios are built and designed specially by all set manufacturers to operate with the EVEREADY Air-Cell "A" . . . a marvelous new "A" battery that re-energizes itself for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household.

But do not confuse the Air-Cell Radios built for the EVEREADY Air-Cell with any other battery set . . . Air-Cell Radios are entirely new from the ground up . . . with quality, convenience and economy you never dreamed possible.

RINK NOTES

We are trying our best to get the rink open for skating Mondays, Wednesdays and Fridays of each week. Wednesday night with band—but we need a little more frost.

Thanks to the Fire Ladties, Chief Sage and his hired help, the kids open air rink is about ready again. You notice we say "Kid's Rink." This rink was started A few years ago by Barney Halpin. Since then the Town has kindly footed the bill for any expenses in connection with running same for Kids only. Big boys please stop playing hockey and give the children 13 and under a chance to learn to skate.

We are glad the Hockey Club under the leadership of Gordon Brown is playing our own boys this year. We say they will get support and have a real team after a few games. "Get in shape, Boys!"

HIGH SCHOOL REUNION

The Annual High School Reunion will be held in the Assembly Hall on December 26, 1934. Each student and ex-student may invite one visitor.

Good music by Bob Paulsen and His Orchestra. Tickets at 50c. each may be procured from the following Committee: Ted Carruthers, Phyllis McKaghern, Mary Gilmour, Clarence Perkins, Eleanor Scorgie, Jean Reeves, Pat Hay, Kae Craigen, Louise Todd, Tom Carruthers, Allan Carter, Harry Wright.

BANQUET

The Board of Trade of Lacombe and District are holding a banquet on Wednesday, Dec. 19th, in the Church Hall, Lacombe at 6:15 p.m. This is the Annual Recognition Banquet to honor those who have brought credit to our district the past year. A special speaker, Mr. E. W. Brunsdon, Gen. Secretary of the Provincial Live Stock Marketing Board, will be present to explain to everyone the proposed marketing act. Everybody interested is invited and urged to attend. The Ladies of the United Church are catering for this banquet and its to be a turkey dinner. Come early and be assured of a seat.

BAPTIST CHURCH

"Rock or Sand." The topic of the evangelistic Sermon Sunday evening at 7:30.

Young People's Meeting Monday at 8 p.m.

Prayer meeting Thursday at 8.

NOVELTY DANCE AT LINCOLN DECEMBER 31st

A novelty dance and New Year's Frolic will be held in Lincoln Hall on Monday evening, December 31st. Be there and dance the Old Year out and the New Year in. Good music by the Red Deer Old Time Orchestra.

"GIVE THE BOYS YOUR SUPPORT"

CHEAPER MILK WITH BALANCE RATION

No machine may be expected to turn out a finished product unless it is supplied with the proper raw materials and fuel or power. Similar the heavy producing dairy cow, which is a much more intricate piece of mechanism than any man made machine, cannot produce her maximum yield of milk unless she is provided with suitable raw materials and fuel, in the form of a well balanced ration and comfortable quarters.

For most economical results, the dairy ration should consist of a variety of succulent and palatable farm grown roughages such as ensilage, alfalfa, sweet clover, brome or prairie hay, in conjunction with the grain. At the Dominion Experimental Station, Lacombe, it has been found that best results are secured when at least two different kinds of grain are fed, and four or more kinds of roughage, one of which is a legume. The meal mixture should be fed at the rate of one pound of grain to each 3 1-2 or 4 pounds of milk produced.

One of the cheapest and best balanced rations consists of the correct amount (as estimated from the milk yield) of a mixture of 400 pounds of oat chop and 100 pounds of barley, together with approximately 16 pounds of legume hay per cow per day.

If no legume hay is available, the mixture may consist of 350 pounds of oat chop and 100 pounds of barley chop, balanced by the addition of 50 pounds of bran and fifty pounds of oil cake meal, and fed in conjunction with about 20 pounds per cow per day and any good hay available, or oat greenfeed.

AT THE AVALON

"ESKIMO"
A Sportsman's Reaction

The following review was written by Mr. Fred Fletcher, editor of "Rod and Gun".

"The other day I saw "Eskimo," one of the finest movies I have ever sat through. I think that every sportsman who hunts or fishes should see it. It depicts how almost primitive man, still with the use of bow and arrow, spear and harpoon, can survive by his own prowess.

"The stampeding of the herd of caribou into the sea and the killing of them with harpoons is one of the most wonderful shots I have ever seen. The capture of the whale and polar bear have no equal. The spearing of wild ducks while in flight is almost unbelievable unless one sees it. The episode in which Mala slays the "big gray wolf" is one of the most blood-stirring things I have ever seen.

"Any red-blooded man that sees the hunting scenes which I saw the other night in "Eskimo" I feel certain will be just as much thrilled as I was, and will recommend his friends to see it."

COMING

"Night Club Lady" and "Thirty Day Princess," featuring Sylvia Sidney and Cary Grant, Dec. 20, 21, and 22.

"Wonder Bar", Monday, Tuesday, and Wednesday, December 24, 25, 26.

Remembrance Day -- Its Memories And Lessons

The world has commemorated another anniversary of the signing of the Armistice,—the sixteenth. Remembrance Day, as we have come most appropriately to call November 11, falling on a Sunday as it did this year, was observed by hundreds of thousands of people in nations all over the world. From the pulpits of churches of all religious denominations Peace sermons were preached and the horribleness and brutality of war vividly depicted and unanimously condemned. Gathered at the graves of Unknown Warriors, assembled about cenotaphs and other monuments erected to the memory of the gallant dead, or meeting in solemn memorial services, men and women formed an almost unbroken circle around the world as they stood with bowed heads and in impressive silence as the hour of eleven o'clock struck.

It was Remembrance Day! People wore flaming red poppies symbolical of Flanders Fields and of the bright red blood of youth there shed. Reverently they laid wreaths of poppies in many hallowed spots. People heard the pipes and drums play "The Lament", the bugles sound "Last Post" and "Reveille", and they saw the Colors slowly dipped.

Pride and sorrow were interwoven and strangely mixed as the memories of those of the older generation were carried back to 1914-1918 and to the first Armistice Day,—pride that men, and women too, had responded to the call of duty when that call came; sorrow that so many had been called upon to make the supreme sacrifice or go through life maimed and handicapped to the end of their days. And mingling with pride and sorrow there was a righteous anger that such a barbarism as War should be permitted and sanctioned by peoples and nations styling themselves Christian and civilized.

But does Remembrance Day mean nothing more than this? Does it begin and end with the twenty-four hours of November 11, and are we then to lapse into forgetfulness for the remaining 364 days of the year until once again November 11 calls upon us to stand in silence and remember?

Consider, you who are now reading these lines: Have the memories stirred only a few short days ago not already begun to fade? Is not that almost red hot righteous anger against War and all that War means which you felt so recently already cooling off? If your passionate demand for Peace, and that never again shall War blast its way in this world, as keen to-day as it was when you stood in a silence that could almost be felt just a few days ago? Alas, it must be so. Indeed it is well that in many respects our human memories are short, else we could not bear the burdens which memory would bring. But it is vitally important to the future of mankind that we should never forget all the tragedy that Remembrance Day brings to mind. So far as the awfulness and uselessness of War is concerned, every day should be Remembrance Day.

Canada is a peace-loving country. If the decision could be left to the Canadian people there would never be another war waged anywhere on this world's surface, nor upon its seas, nor in its air. Canada has always set the nations an example in disarmament; or rather by its refusal to engage in armaments. Our paltry permanent force and numerically small and widely scattered militia is but a domestic police force maintained to guarantee law and order. Of offensive armaments Canada possesses none.

But as a nation of Peace, Canada has a duty to the whole world. At Geneva the voice of Canada is always raised for Peace; in world conference Canada's vote is always cast for Peace. But the responsibility is ours to make our voice for Peace stronger and still more emphatic in a world of nations apparently bent upon engaging in a race for war-like armaments unparalleled in all history.

Narrow nationalism, with all its selfishness, its suspicions, its jealousies and its animosities is the basic, the underlying cause of war. The truth of this statement is emphasized over and over again by the well known international correspondent, Isaac F. Marcosson, in an article entitled "Does Europe Want Disarmament?" Selfish nationalism wrecked the World Economic Conference called to bring about tariff and currency readjustment, and because of that failure the whole world still staggers and suffers. Selfish nationalism has rendered every disarmament conference a failure. And because men still insist upon such narrow national selfishness, the nations are heading straight into another war.

Canada is not free of the taint of selfish nationalism, but it has not the grip on the people of this new and young land that it has upon the older countries of Europe and Asia. Nevertheless, if Canada's voice for World Peace is to be as strong and emphatic as it ought to be, the Canadian people must not only place a curb upon the growth of any spirit of selfish nationalism but we must seek to eradicate it from our individual minds and hearts and from the policies of this Canadian Dominion.

Let us remember and keep fresh the memories and lessons of Remembrance Day, abhor War and all that tends towards War, and think and plan and live for Peace at home and in the world.

Asbestos Suit Stood Test

Man Entered Flaming Building And Left It Unscathed

A man recently walked through a fierce fire, and was unharmed. He was not even in danger of being burned. He was testing a new asbestos suit at Slough. He entered a flaming and smoke-filled building, recovered some heavy boxes, and left unscathed. His fireproof suit consists of a main asbestos garment covering the body and limbs in the manner of a mechanic's jumper suit, heavy shoes and mittens, and a cylindrical mask with a long valance.

A cynical young bachelor who has recently returned from his first visit to a certain health resort, says he has found out that a spa is a place where a woman goes to get rid of her rheumatism and her daughter.

Fish that croak like frogs and others which cry like mice have been found off the coast of England.

Another Old Custom Gone

Turks Allow Windows In Women's Apartments To Be Uncovered

Another old Turkish custom is to go. This is the "kafez", literally meaning "cages", but actually applied to the close wooden lattices which cover the windows of the women's apartments in Turkish houses. Their object to conceal the women from the gaze of man. But the Constantinople authorities have decided that, like the veil, it must go. Reasons of hygiene are given, as it is stated that the wooden shutters kept out the light and air.

At the age of 30, says a statistician, 47 per cent. of men have both father and mother living; by the time a man is 60 if he has both parents living he ranks among five men in a thousand.

For Sale by Your Druggist

CHOOSING YOUR SWEETHEART BY HIS HANDWRITING

By LAWRENCE HIBBERT (Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: Many letters of appreciation have been received from readers who have accented the author's offer of a personal analysis from their own handwriting. Have you sent yours? See the announcement following this article.)

The value of Grapho-Analysis is never more evident than when it is used to assist Cupid. For it tears aside the veil that love so often weaves, and reveals in unerring fashion, the characteristics of the writer.

It is not merely a question of honesty and straightforwardness — although these are points that have to be considered. The emotions and the degree of expressiveness of those emotions—these are of vital importance.

Take, for example, a girl who has a warm and ardent nature; who feels things very deeply, and who expresses that feeling. She likes to be loved and would be very unhappy without the affection of others. What chance of happiness would she have, married to a man who is cool and unemotional; who dislikes any manifestation of affection; and who is so governed by his mind that he hasn't a generous streak in his nature?

Only the other day, I received a very poignant letter from a girl of 24 years of age. She was married two years ago, but has never been happy, since the first raptures departed. She is of the type I mention above, and asks me why she is unhappy, and wonders whether she is responsible.

The writing of her husband, which she enclosed, shows that he has about as much feeling and affection as a gargoyle.

These two are mismated; I can see very little chance of happiness for them. Her's is a case where the advice of a Grapho-Analyst would have prevented much unhappiness.

There is an old saying that opposites make the happiest marriages. This is fallaceous. Look on every side of you, and you will find married people who are unhappy and discontented, because their natures are so unlike.

Marriage demands affinity of interests. It is too much to ask, or to expect, that the average couple will have all the same interests, the same likes and dislikes—and there is a good deal of compromise necessary in most marriages.

But a young couple whose natures are at the opposite ends of the pole are starting out with a tremendous handicap. And that it is too great a penalty is seen by the number of unsuccessful marriages.

M. H., Toronto.—By all means sue your husband for divorce. Yours is a sad case. Married four years ago, your husband left you three years ago, and now you meet a young man who loves you. He is a straightforward young man, and is trustworthy enough cannot be said for your husband. I am writing you direct regarding the personal matter.

Can the author help you? Can he show you what your friends are really like? A personal analysis may be very helpful to you. Send specimens of the writing you want analysed, and enclose 10c coin for each. Send with 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. Letters are, of course, confidential, and will be answered as soon as possible, but please allow about two weeks for your reply.

Spruce From British Columbia

Used In Plane Which Won London-To-Melbourne Race

Silver spruce cut from the forests of Queen Charlotte Islands, British Columbia, contributed to the triumph of C. W. A. Scott and Tom Campbell Black in winning the London-to-Melbourne air race in record-smashing time.

T. A. Kelley Logging Company at Vancouver was advised by cable from Bryan Gattie of Partridge & Cox, the company's London agents, that Canadian silver spruce from the Queen Charlottes, logged by the Kelley organization and milled by Powell River Company, had been used in construction of the famous scarlet de Havilland Comet plane piloted by Scott and Black.

This is not the first time that the strong, light and flexible spruce of British Columbia has won honors as a material in aircraft construction. During the war large quantities of spruce from the Queen Charlottes and elsewhere in the province were logged and shipped by the imperial munitions board for the making of war aeroplanes. Since then, the spruce stands of British Columbia have been in favor as a source of aircraft material.

Made His Own Canoe

Axe Was Only Tool Used By One-Armed Hunter

Max Hickman, one-armed bear-hunter of the Atnarko river country, near the head of the Bella Coola valley, B.C., has completed making a canoe 30 feet long, which he hollowed out of a fir log. With an axe as the only tool, it took him a little more than seven days to fit the craft for water.

Despite the fact that he has only one arm, Hickman is renowned as one of the most fearless hunters and meets the charge of an enraged grizzly just as casually as he does the advances of his pets.

Car Accidents Increase

Automobile accidents in Ontario for the first nine months of 1934 were 9.2 per cent. above the same period last year with the death toll at 360, Hon. T. B. McQuestin, minister of highways, announced.

A statement isn't necessarily false because you disbelieve it.

INDIGESTION? Then Try KRUSCHEN at NO EXPENSE

If you suffer from loss of appetite, indigestion, sour stomach or a miserable feeling after meals there's nothing like Kruschen for relief. The little daily dose of Kruschen first stimulates the flow of gastric juices to aid digestion, and then ensures a complete, regular and unfailing elimination of all waste matter every day.

If you suffer, you'll welcome the opportunity to try Kruschen Salts now positively free of charge Ask your druggist for the Kruschen Giant Package. This is the Regular bottle, together with a separate FREE TRIAL bottle. Use the Trial bottle first. Then if you are not entirely convinced that Kruschen will do everything claimed for it, return the Regular package unopened to your druggist and he will redeem it at full value. But act quickly or your Free Trial Bottle will be gone. Your druggist has only a limited supply.

Dominion Drama Festival

Brilliant British Playwright Pays Compliment To Canada

Canada is fortunate in having the Dominion drama festival established on such a firm basis, in the opinion of Noel Coward, brilliant British playwright, composer and actor, who is paying his first visit to Canada.

The Drama festival, he believes, is a distinct contribution to the theatre in that it makes people "theatre-minded," and stirs up interest among the members of Little theatre groups, their friends and associates in an ever-widening circle.

"It is most interesting," said Mr. Coward, in an interiew at Ottawa. "I should like to attend a festival. If possible, I shall be here next spring."

Only 36 years old, Mr. Coward is one of the most successful living writers for the stage. He already has had 24 or 25 plays produced. Now he is on the way to Milwaukee to attend a rehearsal of his latest play, "Point Valain," which will open in Boston Christmas night.

Radio 'Phones For Signal Corps

Alberta Divisions To Have Newest Apparatus Next Year

One of the most modern devices in military equipment will be placed in operation at Edmonton early next year.

This is a radio-telephone set which is being supplied to the Edmonton companies of the 13th divisional signal corps. Another one will be supplied to Calgary.

Demonstrations as to the feasibility of this equipment were given at the annual meeting of the Canadian Signal Association at Toronto recently.

The device was developed two years ago by the British war office and now has reached 100 per cent. efficiency.

When the set is in operation, it is possible to carry on a two-way conversation at a distance of five miles, and while a car carrying the equipment is travelling at 40 miles per hour.

A number of instruments are being ordered from the old country and will be distributed to signal units early next year. While only two are being sent to this province at the start, it is expected that more will be supplied later in the year.

Canada's Beauty Show

Chrysanthemum Show At Ottawa A Riot Of Color

Beauty incomparable is the feature of the annual Chrysanthemum Show held at the Central Experimental Farm, Ottawa. The display of 2,000 individual plants with over 20,000 blooms presents a riot of color and shades, and is considered to be the finest show for several years.

There are 32 named varieties of chrysanthemums, and 100 new varieties as yet unnamed, all of which were originated at the Central Experimental Farm. There are also many of the very finest specimens of the standard varieties. One of the special attractions of this year's show is the "J. R. Booth," one of the finest of the farm creations, and named after the late famous Ottawa lumberman and railway builder. It is a brilliant yellow that now holds regal rank among Chrysanthemum enthusiasts.

The Chrysanthemum Show held annually at the Central Experimental Farm in Ottawa is among the finest of its kind on this side of the world.

There would appear to be a serious shortage of alsike for domestic needs in Canada next spring as the 1934 production, plus the small carry-over, is not expected to exceed more than one-half normal requirements.—Dominion Seed Branch.

for COUGHS

Take half a teaspoonful of Minard's in molasses. Heat Minard's, inhale it. Also rub it well into your chest. You'll get relief! 32

MINARD'S "KING OF PAIN" LINIMENT

W. N. U. 2073

A World-Famous Choir

Founded In Vienna By Imperial Decree In 1498

London heard one of the world's most famous choirs in October.

The Viener Saengerknaben — the Vienna Boys' Choir—has had a colorful history ever since it was founded by Imperial Decree in 1498. Famous singers and musicians have been its choristers, and its singing has delighted emperors, kings, popes, and princes for four hundred years and more. The collapse of the Hapsburg dynasty nearly meant the end of the choir, but it was rescued by Father Schnitt from the general debacle. Now it has come to England for a first visit, and Father Schnitt came too.

Haydon and Schubert were both choir boys, so it is fitting that the music of these two masters should form an extensive part of the choir's repertoire. Franz Schubert entered the convent of the Imperial Chapel at eleven years old and stayed there until he was sixteen. He became the choir's soloist and first violinist of the orchestra. Haydn, the oldest of twenty children, was the son of a poor rural wheelwright. He, too left the convent at sixteen, when his voice "broke".

All the boys attend the same school that for four centuries has been the home of the choir.—London Daily Mail.

Curious Belief In India

Flies Are Supposed To Be Spirits Of Ancestors

Some idea of the difficulties under which the surgical work is carried on in India was described by Miss Kathleen Tucker, a missionary visiting Winnipeg on furlough.

Swamps are nearly all malaria-laden. Because of religious belief, Indians fear to destroy the poison-bearing flies, which may be the spirits of their ancestors. Only in part has the woman doctor persuaded the inhabitants to have some of the swamps sprayed with the same solution which was used in the Panama canal zone. Again germ-infested air must be kept out of the room where operations are performed. Consequently it is hermetically sealed. Under a temperature rising as high as 120 degrees, perspiring doctors perform their tasks.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

—No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels, every day. Without this bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General wretchedness.

How can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c, at all druggists.

Space Will Be Inadequate

Large Building Required If All Departmental Records At Ottawa Kept

Plans for a building in Ottawa to hold departmental records once more has forced on the government the problem of seeking to get a decision on what records should be kept and what should be thrown away. Efforts throughout the summer to reach some solution have been without success so a building will be erected which will take care of about half the present day requirements and let the departments battle it out for space in it.

The new plans call for a building with 100,000 square feet of floor space. It developed that if all the departments obtained the floor space they felt was needed with any regard for the future, a building covering an acre and rising 10 storeys high would have been the result.

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wernet's Powder. Largest seller in world—holds plate so tight they can't annoy yet so comfortable they actually feel and act like your own. Keeps mouth sanitary, breath pleasant—special comfort-cushion prevents sensitive gums from getting sore. Small cost—say druggstore.

Keeping His Promise

Princess Elizabeth's Uncle Taking Gold Nugget From Australia

"Uncle Henry" is going to take a gold nugget back to London as a gift to the pretty eight-year-old Princess Elizabeth, the daughter of the Duke and Duchess of York, just as she wished.

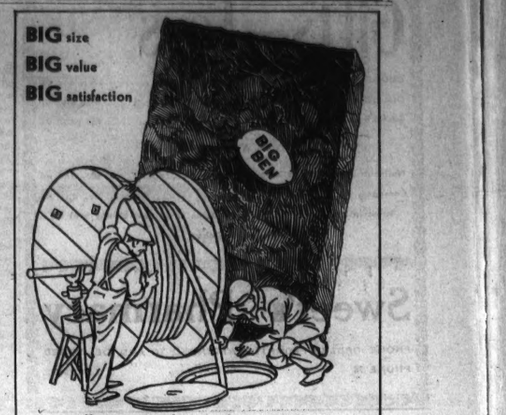

Before leaving for Australia on his current good-will tour the Duke of Gloucester asked Princess Elizabeth what she wanted him to bring her. The Princess, having read her geography books, quickly replied "a gold nugget, please, Uncle Henry."

The Duke wondered how he could comply until he was presented with three nuggets while on a tour of a mining district, one of which he pocketed for Elizabeth.

Will Have Representative

A representative of the Peace River district will be added to the western board of grain standards, it was promised by E. B. Ramsay, chairman of the board of grain commissioners.

BIG BEN

THE PERFECT Chewing Tobacco

Complete Busy Season

Freight 'Planes Flew 130,000 Miles During The Summer

Flying 130,000 miles and ferrying enough equipment and supplies to serve the needs of a good sized town over desolate mountain regions, three aeroplanes of United Air Transport Company have completed the busiest season in company history, according to Chief Pilot Grant McConachie and Ted Field, both Edmonton fliers, who arrived here with two machines from Prince George, B.C.

The aerial freight carried in the past season, Mr. McConachie related, included mining machinery and equipment of every kind, even to a complete sawmill. Bulk of the flying was done for Two Brothers Valley gold mines.

"We had a great season," Mr. McConachie said. "Our three machines had a total of 1,200 hours in the air, operating out of Takla Landing in northern British Columbia. We had trips to Alaska and the Yukon and considerable district flying.

The company's third machine, flown by Gil McLaren, Calgary, is remaining at Takla Landing over the freeze-up.

New Source Of Wealth

Farmers To Benefit From Better Grades Of Barley

Barley, a source of new wealth to farmers in both Eastern and Western Canada, held the spotlight as the annual meeting of the associate committee on grain research of the national research committee concluded.

During lengthy sessions the special committees seeking better grades of barley reported on their work, covering 16 problems, and Prof. J. T. Jackson, on the research staff of the board of grain commissioners at Winnipeg, will issue a statement summarizing the findings and work of the committees.

Progress in the analysis of barley production and marketing for malting purposes had been made, said Dr. R. Newton, Ottawa, Dominion cerealist and chairman of the sessions. Cleaning and handling had been carefully studied and a sub-committee was appointed to continue research work at the University of Manitoba.

Limousine Of The Air

Luxurious 'Plane Being Built For Viceroy Of India

Probably the most luxurious aeroplane ever planned is nearing completion at the Avro works. It will be a limousine of the air, and will have many of the comforts of a first-class hotel.

The machine, a four-engined monoplane, is being built for the personal use of the viceroy of India, Lord Willingdon.

The cabin includes a drawing-room, dining-room, and an office in which Lord Willingdon will be able to deal with official matters while in flight. All will be furnished and decorated in exclusive styles.

The machine will have a maximum speed of 150 m.p.h., and a cruising speed of 127 m.p.h. On special journeys it will be able to fly 600 miles without refuelling.

In the desert country, many animals never drink water. Their need for moisture is supplied by chemical action in their digestive tracts, which turns some of their starchy foods into water.

There are two sunsets at certain times of the year in the town of Leek, England. The sun disappears behind one flank of "cloud hill" and reappears beyond the other.

The walls and ceilings of a new restaurant are composed entirely of giant mirrors. We understand, however, that male customers are catered for as well

Business Improved

Conditions In General Throughout Canada On Uptrend

Conditions in general throughout Canada have improved considerably and gradually since the low point in the early spring of 1933, the executive council of the Canadian Manufacturers' Association reported, coincident with the official opening of the Produced-in-Canada exhibition in Montreal.

Figures the council believed encouraging were presented in regard to empire trade. For the 12 months ended September, 1934, Canadian exports to empire countries represented over one-half of total exports to all other countries. The report adds "for this 12-month period our exports to empire countries amounted to almost $324,000,000 which is greater than our exports to empire countries in 1930 when they amounted to $316,000,000.

"Our exports to foreign countries, however, for 1930 were no less than $567,000,000 as compared with $307,000,000 for the year ending September, 1934.

It is never later than 6 o'clock in San Marino, a tiny republic in Italy, where the day is divided into quarters and no clock ever strikes more than six strokes.

Mr. Newrich—"Well, m'dear, we're invited to the Country Club for dinner tomorrow night."

Mrs. Newrich—"How nice! I've always wanted to eat there—I've heard so much of their unique golf course."

Little Boy: "Isn't father queer?"
Auntie: "In what way?"
Little Boy: "When a boy does anything for his pa, he doesn't get anything, but if another man's boy does it, he gets a nickel."

Hogs graded in Canada for the first 43 weeks of 1934, ended October 25, numbered 2,373,094, a decrease of 172,450 on the corresponding period of 1933.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons — instead of their doctors' — on remedies for their children.

If they knew what the scientists know, they would never take this chance.

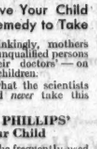

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia — the safe remedy for your child."

Remember this — And Always Say "Phillips'" When You Buy. Your child deserves it, for your own peace of mind, see that you get it — Genuine Phillips' Milk of Magnesia.

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

MADE IN CANADA

Good Success Is Attained In Search For Drouth Resisting Wheat Of High Quality

Six years' intensive study to-day is bringing success in the search for a drouth resisting wheat with all the qualities of the famed Marquis and Reward strains.

"Drouth resisting wheat, including all the desirable agronomical qualities, is being achieved although a few years more will be required before it is ready to be placed at the disposal of the growers," declared Dr. O. S. Aamodt, youthful member of the department of field crops, University of Alberta.

Dr. Aamodt took time out from the sessions of the associate committee on grain research, a branch of the national research council, to detail achievements reached. "But don't think we are producing a wheat that will grow without moisture," he warned. "That is impossible."

The characters developed so far in the drouth resisting wheat hybrid were the ability to resist permanent wilting, growth habit favorable to dry periods, intensity of root systems and ability to germinate in dry soils. "Experiments in actual growing in the last two years show clearly drouth resistance can be transferred from one variety to another and in combination with other desirable agronomic qualities," Dr. Aamodt declared.

Ability of the strain to resist permanent wilting was among the major assets. Many wheats in use now take root and start to grow but when a dry spell comes along they wilt and die. The objective in the drouth resisting wheat is to give it the ability to recover from the wilt—a case of lying dormant when moisture is lacking and taking life again when rain falls.

The growth habit came in for study when it was found drouth caused its greatest damage when the green shoots started to appear. Tests made show the drouth resisting hybrid goes through the shooting period in one week compared with two or three weeks for most other grains. Thus the danger period to the plant in its early stages is greatly reduced.

Intensity of the root system was a vital factor because the greater the intensity the more moisture the plant is capable of drawing from the soil. In this respect Dr. Aamodt pointed out past studies throughout the world were largely confined to the part of the plant above the ground.

Dispels All Doubt

Diary Of Man Who Risked Ocean Trip In Canoe Has Been Found

A tin can came to the Smiths of Peterborough, Ontario, and brought with it confirmation of tragedy bright with courage.

Found on the shore of Red Bay, Newfoundland, it contained the blurred pages of a notebook 24-year-old John Smith bought at a local stationery store just before he set out last June 18 on a journey designed to finish in fame, and which ended in death.

"Log of the Pride of Peterborough" was scrawled in large red letters across its inside cover.

The "Pride of Peterborough" was the slight canoe in which John Smith hoped to paddle from Peterborough to Peterborough, from Ontario to England. Ever since a battered body was picked up at Long Point, Port au Port, Newfoundland, Sept. 6, his family refused to believe him dead. The body was clad in a rubber safety suit, which Smith did not possess when he left home, but one entry in the log dispelled doubt:

"July 17: Left Rockcliffe Hall. Was saluted by whistle. Heavy gale from astern. Put on and wore safety suit donated by Captain Bowen. Kept very dry and comfortable in it."

A matter-of-fact record of the days and nights spent in negotiating the inland waters to the sweep of the gulf is included in the log. The can, sent by Newfoundland Wreck Commissioner A. B. Harding, also contained five emergency flares, two of which had been burned.

The last entry is dated July 19. On July 20, Smith set out to cross the gulf and was never seen alive again.

Seem Easy To Lose

The Victoria railways have lost a railway coach—but that is nothing to what has happened in other parts of Australia. In New South Wales someone forgot a locomotive. A line leading from a country brickyard was pulled up, and the engine was left stranded. A suburban council some time ago lost a steam roller. It was found in a remote back street. A shipping company lost a boiler. It was found a year later in a dark corner of a steamer's lower hold.

The Mexican bean beetle, which has been kept out of Canada, with the exception of certain sections of southern Ontario, has been more abundant and widely spread than ever before during the past year in Maine and other New England and Middle Atlantic States. Canadian gardeners near the border should be on the lookout for this beetle.

Some Wonderful Tongues

Nature Provides Marvelous Ones For Some Animals And Insects

Most people imagine that the human tongue is the most efficient in the world; actually, those of certain animals and insects leave it far behind. The chameleon's tongue, though three inches long, is invisible except to the scientific eye of the camera, so quickly does it move. It works like a pop-gun, hitting with unerring aim insects on the barks of trees and whisking them back on its sticky tip into the owner's mouth. Nature forgot to give the snake ears; but she gave it a tongue equipped with auditory organs that enable it to amplify the slightest sound. The snake also employs its tongue as a "feeler" in the dark. Another marvellous contraption lies in the butterfly's mouth. Consisting of two spiral tubes, when uncoiled and at work it sucks up the juices of flowers like a vacuum cleaner. The lion's tongue is furnished with an array of dagger-like bristles.

An Ancient Puppet Show

Small Figures 5,000 Years Old Found In Tomb

Marionettes have been found among the rubbish in the shaft of a tomb near the pyramid of Sesostris at Lisht. The tomb is of the twelfth dynasty, and other objects found in the rubbish are certainly of that period, so that there is no doubt the new finds are 5,000 years' old. There are three figures two inches high representing little men dancing and clapping their hands. One of the tiny men apparently had grown horns. Mounted on small pedestals they fit loosely into an ivory slab, and both pedestal and slab are pierced with holes through which strings can be threaded and pulled to make the figures dance.

SMART DAY DRESS SO SIMPLE TO MAKE—JUST A LENGTH OF MATERIAL — YOU'RE READY TO START

To-day's pattern points the way to an altogether charming, inexpensive and simple to create dress.

It's snappy too, as pictured in dark green woolen with gold metal threads. The velvet trim tones with the green.

An adorable idea too, is black canton crepe with self-fabric applied bands, as seen in miniature back view. The pattern provides perforations for same.

A gay angora plaid would also be charming for it with collar and deep cuffs of plain toning woolen.

In sapphire blue velvet, it's stunning for more dressy occasions with silver lame collar and cuffs.

Style No. 870 is designed for sizes 14, 16, 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3¾ yards of 39-inch material with ¼ yard of 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Canada's Mountain Highways

All Weather Road Projected From Jasper South To Lake Louise

Gradually the frontier of motor travel is reaching out to embrace new and hitherto untravelled fields of tourist delight, and to gladden the heart of the motor nomad comes the announcement by the Canadian and Alberta governments of intention to complete motor highway projects in the province of Alberta, not only for the improvement of existing links with famous national parks, but to bring within reach of motor tourists from all parts of the continent the innermost portion of the Northern Canadian Rockies, a territory known to surpass in sheer beauty and mountain grandeur anything yet revealed to the modern tourist world.

First of these projects under the jurisdiction of the Alberta provincial government is the completion as an all-weather route of the motor highway between Edmonton and the famous 4,200 square-mile mountain playground known as Jasper Park. The second project, by far the most ambitious tourist highway project yet attempted in Canadian mountainland, is that of the Canadian Federal Government, involving the completion of the all-weather highway south through the heart of the Alberta Rockies from Jasper to Lake Louise, connecting Jasper and Banff National Park. This new highway will have a total length of 147 miles, 58 miles of which are now complete. When completed this mountain highway will enable the motorist to traverse the heart of the Rockies "in behind" the main range, and will unroll a gorgeous panorama of mountain grandeur hitherto unrevealed to the outside world. It skirts great glaciers and penetrates to the cradle of the rivers that water the great plains of Western Canada. The complete circle of Alberta's national parks will approximate 1,100 miles.

Taking Mink To England

Young Manitoba Boy In Charge Of Valuable Shipment

In charge of a shipment of 351 Manitoba-bred mink, bound for the Old Country, Donald Duchamre, 16-year-old lad from Delta, Manitoba, left Winnipeg recently over Canadian National lines. Donald was born at The Pas, but his parents died when he was but a few years old. Some time ago he found his way to Delta, a short distance from Winnipeg and got a job on a mink farm. He is now an expert at handling the valuable little animals.

Donald saw his first street car when he arrived in Winnipeg and his eyes were literally "popping out" in his travels around the city. He was looking forward to his first long train ride to Montreal but rather thought he would be a bit wobbly when the steamer crosses a rough spot on the ocean.

The mink were bred in Manitoba and are housed in 90 crates. The shipment is valued by the owner, G. F. Blyth, at more than $17,000. More mink joined the party at Montreal prior to sailing for the south of England on the liner Ausonia.

Plenty Of Foodstuffs

As Floating Restaurant New French Liner Will Set Record

When the giant liner Normandie, French bid for supremacy of the seas, sets forth on her maiden voyage to the United States she will set a new record as a floating restaurant at least.

The Normandie will carry the most elaborate arrangements any ship ever had for feeding her passengers.

Here is an idea of what foodstuffs will be aboard the Normandie every time she sets out on a crossing: 70,000 eggs, 7,000 chickens, 32,000 pounds of meat, 6,950 bottles of wine, 2,600 bottles of spirits and 16,000 quarts of beer.

More than 14,000 forks, 12,500 knives and 15,000 spoons will help out.

There will be three ship physicians, nine barbers and hairdressers, 16 musicians, 187 cooks, six wine stewards and 628 stewards.

In addition to the captain and two first officers, nine officers will march the bridge.

Providing Timothy Seed

Thanks to the continuous efforts of the Dominion Seed Branch and farmers who have followed the branch's policy, Alberta and British Columbia this year will provide 50 per cent. of Canada's timothy seed requirements. Prices are the highest in years. At an average of 15 cents a pound, Alberta's crop will be worth $250,000.

The human flea is reported for the first time in the province of Quebec. The only other records of this species in Canada, says the Entomological Branch of the Dominion Department of Agriculture, are from isolated localities in Prince Edward Island, Saskatchewan, and British Columbia.

Attendant: Do you wish to consult Woosung Footung, the great Chinese mystic?

Woman: Ay, ' lass—tell 'im 'e mother's 'ere from Lancashire.

"Did you pass your exam?"

"Well, it was like this—you see ——"

"Shake! Neither did I."

SET NEW RECORD

Cathcart Jones (bottom) and Ken Waller (top), have just completed one of the most remarkable flights in aviation history—a race across three continents and back in 13 days, six hours and 42 minutes. These speedy pilots finished fourth in the England-Melbourne Air Derby, and then flew back to England in five days 15 hours. During the 23,000-mile flight, they stopped almost two days at Melbourne, the same at Athens, and a day at Allahabad; in other words, they completed the round trip in less than seven days' flying time.

Lives Like Robinson Crusoe

German Has Enjoyed Himself On Island Twenty-Two Years

Paul Tile, a German, has been living as a modern "Robinson Crusoe" on a small island near Plat, Jugoslavia, for twenty-two years, and enjoying it. He was discovered recently and now crowds are visiting the place. Even women, whom Tile dislikes, have "crashed" the island by wearing male apparel. The man has planted orchards and vineyards, raised goats, kept bees, built a house made fishing nets and tools, and woven cloth for his clothes. He has even built concrete bridges across the narrow strip of water which separates his island from the mainland. Tile, once was a German hotel keeper. He divorced his wife in 1912, and since then has always shunned the sight of a woman. He sold his hotel, and bought the island.

An instrument has been perfected in Germany to measure the density of fog.

Canadian Employment Gains

Increase Of Ten Thousand Workers Shown As At Oct. 1st

Industrial employment in Canada at the beginning of October showed an increase of over ten thousand workers according to a statement released by the Dominion Bureau of Statistics. Reports were received from 8,864 firms, whose staffs aggregated 933,486 persons, as compared with 923,078 in the preceding month. The gain in employment at this time of the year is particularly important, as in the thirteen preceding years for which statistics are available activity has frequently declined between September and October. The index, based upon the average for the calendar year 1926 as 100, stood at 100.0 on October 1, 1934, compared with 98.8 on September 1, 1934, and 90.4 on October 1, 1933.

The most outstanding feature of the October 1 survey of employment was the unusually pronounced expansion in bush operations, which directly provided work for over 7,600 persons among the co-operating firms. Mining showed the greatest October 1 gain on record; transportation, building and construction trade also reported considerable improvement over the preceding month. A slight advance occurred on the whole in manufacturing, being the ninth consecutive gain since the opening of the year. On the other hand, communications, highway and railway construction, and hotels and restaurants released a large number of persons as the active season drew to a close.

Studying Lake Of Reptiles

Expedition Finds Queer Creatures Within Borders Of Abyssinia

Lake Rudolf, in Africa, where reptiles rule much as they did millions of years ago, is being studied by an expedition which has established itself on a volcanic island of four square miles. The brackish sheet of water covers 3000 square miles and lies 1300 feet above sea level. It is within the borders of Abyssinia, Kenya, and the Sudan. Crocodiles abound there, while monitors larger than man prowl slowly about, digging for the crocodile eggs on which they feed. They resemble dragons as they thrust out their long purple tongues. Monster turtle ignore the crocodiles, whose teeth would break against their hard shells. The few species of birds include peculiar spoonbills, which lay orange-colored eggs on rocky ledges, razor-billed skinners and cormorants, who visit the lake only at night.

Showed The Way

Being asked, after his great voyage, if he did not think others could have accomplished it, Columbus is said to have invited the questioner to make an egg stand on end. When he failed, Columbus struck the egg on the table and made it stand on the broken part, so suggesting that now he had shown the way to the New World anyone could follow it.

The SNAPSHOT GUILD

SNAPSHOTS AT NIGHT

Just a few bright lamps and a little care make indoor snaps like this easy. Arrangement of lights, subjects and camera indicated in the diagram.

Until recently, the idea of making snapshots at night ranked alongside that other classic picture-taking impossibility—a snapshot of "a black cat in a coal pile at midnight". But now, with the new extremely sensitive films and brilliant, inexpensive lights, snapshots indoors at night are as easy as any others.

Let's say you want to snap Sue at the piano—assuming that Sue looks and feels natural there—taking your stand, with camera, off to the side of the piano. There's an ordinary floor lamp—one of those three-light affairs—just beyond the piano and another on your side. Both lamps are just beyond the field of your camera finder. Tilt the shades so that the light reaching your subject is unshaded. Put two or three photoflood-type lights in the lamp that's beyond your subject, one in the nearer lamp, turn 'em on—and blaze away.

If yours is a box camera, better use a photo-flash bulb. (The method is described a few paragraphs ahead.) On the other hand, if you use a more advanced camera with a lens that's "faster" than f.6.3, you won't need the photofloods quite so close to the subject.

The regular snapshot exposure—1/25th of a second—will do the trick nicely, assuming your lens has an opening of f.6.3 or greater.

The diagram above indicates the relative placing of subject, lights and camera for the picture of Sue at the piano. Naturally, you will arrange the lights as you see fit, but keep in mind these simple rules:

First, light intensity decreases rapidly as the lamp is pulled back from the subject. Six feet away, a lamp's picture making brilliance is only a quarter what it is at three feet.

Second, shield your camera lens from the direct rays of light.

Third, while you can use photofloods (they cost a quarter and are good for at least two hours of picture making) in ordinary fixtures, they are more efficient in reflectors—either home-made or inexpensively purchased.

Fourth, don't try to light up everything in a picture. Shade is just as important as the highlights.

Fifth, avoid lighting that illumines both sides of a subject's face equally. The result will be flat and unnatural.

Sixth, always use modern, supersensitive film. It's available in the standard makes, at very slight extra cost.

Indoor snapshots may also be made with photoflash bulbs. If you want to stop ping-pong players in action, for example, these handy, safe, inexpensive flash bulbs are just the thing. One of the medium-size bulbs will do very well in an average room. If you haven't a battery-operated holder for flash bulbs, you can screw the bulb into any standard electric light socket and, when all's set, turn on the current.

The possibilities for indoor snaps are endless. If you haven't tried your hand at this kind of snapshooting, you're missing a lot. And that's too bad.

JOHN VAN GUILDER

Speaker Maintains That Drouth Is Only Passing Phase And Climatic Conditions Not Changed

Speaking before a Kiwanis meeting at Swift Current, Hon. J. G. Taggart, provincial minister of agriculture, expressed full confidence in the future of agriculture in Saskatchewan. He criticized the theories of impounding surface water by the erection of dams and planting trees, in respect to the influence of such practices on climatic conditions. He stressed the need of apprising the whole of Canada of actual conditions in the prairie areas and the facts upon which agricultural recovery should be based.

Declaring that in historic times there had been no substantial change in climate in any part of the world, except through physical influences, Mr. Taggart told of drouth periods in Saskatchewan in the late '80's and the early '90's and in the early '70's, and said these experiences had been worse than the present, there having been great destitution and suffering. The country was not a desert, and one must not accept temporary conditions as a forerunner of extended drouth, there being every reason to expect a recurrence of wet years.

The problem of the settled districts in the areas affected by drouth was adjustment; a type of agriculture and of life should be adopted to make for reasonable security. Crops should be raised that were best suited to the environment, and it should be recognized that cereal crops were best adapted to the southern Saskatchewan region. Agriculturists should adopt the best methods scientifically and apply the resources at their command to secure the best in cultivation and marketing, experiments of all sorts being conducted before general adoption. Wheat, the minister said, would continue to be the major crop of southern Saskatchewan, plus minor products of other sorts, largely for local consumption.

Scouting the theory of influencing climatic by impounding surface water, Mr. Taggart still maintained that dams were valuable for water surfaces, for impounding water for stock and for irrigation to assure winter feed. Tree planting on farms was also valuable for certain purposes, chiefly shelter and improvement of home surroundings, but not as a climatic influence.

Treating of the misconception of present prairie conditions on the part of people in other parts of Canada, the minister declared it to be the duty of citizens to impress upon others the fact that the future of agriculture depends solely on precipitation, not on pet theories.

There were many things that could be done to improve the situation in respect of crops, individually and collectively, but these should be based on adaptation to physical conditions.

Noting that in Saskatchewan areas that had passed through former periods of drouth and in which drouth had again come there was much less suffering than in areas where the settlers had no such experience previously, Mr. Taggart declared his conviction that the agricultural experience of the last few years in Saskatchewan would mean much to our farmers in the next ten years.

An Architectural Wonder

Mosque Of St. Sophia To Be Turned Into Museum

Christians, as well as Mohammedans, will be interested in the announcement that the mosque of St. Sophia is to be turned into a museum.

Constructed by Justinian the Great and consecrated on Christmas Day, 537 A.D., St. Sophia is said to be the oldest Christian church in the world, as well as the finest surviving example of Byzantine architecture. When the Turks took Constantinople in 1453 they turned the building into a mosque.

The adaptation of St. Sophia to Mohammedan worship required the erection of the minarets that stand at its four corners and numerous interior changes. The Koran forbidding the reproduction of any animate object in pictorial form, all of the magnificent mosaic representations of Christian personalities were covered over. When the mosque was repaired in the middle of the last century the Sultan allowed the remaining mosaics to be covered with matting before being plastered up, a concession which protected them for future disclosure.

A Christian church, a Mohammedan mosque, a museum. Such is the story of St. Sophia through the 1,397 years that have elapsed since its consecration. Justinian built it at a time of great Christian ecclesiastical influence in Constantinople. The Turks occupied it at the height of Mohammedan influence. As a museum of antiquities it will be preserved for future generations to admire and marvel at.

A worse fate might have overtaken this architectural wonder. The greatest monument Justinian the Great erected might have been torn down and its site turned into a parking lot.—Detroit Free Press.

Outstanding Writers Started As Reporters

Many Of Most Eminent Were Trained On Newspapers

The best selling books of the ages frequently are the masterpieces of history, according to M. Lincoln Schuster of a New York book publishing firm.

Mr. Schuster told the Columbia University School of Journalism this exploded some fallacies connected with the book publishing business and said many of the most eminent writers had been trained on newspapers.

He named Daniel Defoe, Benjamin Franklin and Charles Dickens as journalism's "early practitioners." John Milton, belonging to an era before newspapers as such had made their appearance, he termed one of journalism's "early champions."

The idea publishing is purely a dilettante pursuit, consisting chiefly of drinking tea with authors, was one fallacy Mr. Schuster exploded for the aspiring newspaperman. Not even at so-called literary teas, he advised them, is tea the drink. He listed as other fallacies: That good reviews necessarily meant good sales; that publishers conspired to discourage new and unknown talent; that attempted suppression or censorship made a book a best seller; that sensational best-sellers were forgotten after the first season was over.

Books such as "Don Quixote," "Pickwick Papers," and "Huckleberry Finn" had been spectacular best sellers from the day they were published, Mr. Schuster said.

Manitoba Municipalities

Remarkable Improvement In Financial Position Is Indicated

Reflecting higher prices farmers are receiving for grain and the good work of rural administrators, a remarkable improvement in the financial position of Manitoba's rural municipalities is shown in the report of D. L. McLeod, minister of municipal affairs.

Out of a total of 170 municipalities 123 are now operating on a cash basis against 53 in 1932 and 41 the year previous. The 1933 levy amounted to $6,887,848, and 94.09 per cent. has been paid into government coffers. Only 78.52 per cent. was collected in 1932 when the assessment totalled $6,311,760.

"Consolidation of taxes with essential reduction of levies have materially aided taxpayers to meet their obligations", Mr. McLeod said. "Better prices for grain have helped, of course, but it should be remembered cattle and dairy products still remain at a low level."

Learned Another Way

A bumptuous fellow was giving evidence in a police court.

"You say you stood up?" asked the Magistrate.

"I said," retorted the conceited one, "that I stood. If one stands one must stand up. There is no other way of standing."

"Oh, isn't there?" replied the magistrate.

"Pay two pounds for contempt of court, and—stand down!"

Studied Heat Casualties

More Men Affected But Death Rate Higher For Women

Staff physicians of hospitals at Kansas City, who treated many heat victims last summer, are now checking over their records and seeking to throw more light on the subject. Medical literature, they say, does not hold a great deal of information on heat attacks.

At General Hospital 82 cases were treated, of which 63 were heat stroke. The others were heat exhaustion. In the former it was found the temperature usually was far above normal, but the body was cold and clammy. More men were felled by the heat than women, but the mortality rate was higher for women. Death resulted in 34 of the 82 cases, 32 of the deaths being among those suffering from heat stroke.

Other data showed that where the temperature reached 108 degrees death resulted in 63.4 per cent. Those who suffered from cyanosis (blue lips and finger nails) died in 78 per cent. of the cases. The death rate of those who lost consciousness was 55.5 per cent. All whose blood pressure fell below 90 died, and 54.5 per cent. of those whose pulse beat passed 140 beats a minute succumbed.

Backing To Starting Point

A Scotsman and his wife and three sons sat down to their evening meal.

Sandy inquired of the boys which of them would rather have a nickel than a slice of roast beef. All three boys preferred the nickel and Sandy gave them each a nickel. Then he turned to his wife and said:

"Put away the roast beef till to-morrow, and bring on the pie."

When the pie came, Sandy turned to the boys and asked:

"And now who wants a nickel's worth of pie?"

A newly-invented glass may be heated and then plunged into ice water without cracking.

Gift Suggestions From Our Dry Goods Department

Gift Slippers

Leather, patent and felt. Colors: Red, Black and Brown. **$1.25 to $2.50**

Dressing Gowns

Fine pure wool plain shades and stripes. Colors: Blue, Rose and Green. Sizes small, medium and large. **$5.50 and $5.95 each**

Dressing Gowns

Fancy eiderdown. Color blue, rose, wine, green. Sizes small, medium, large. **$3.50 to $4.50 each**

Gift Lingerie

Crepe-de-chine sets. Panties & Brassieres. Colors: Peach, Pink, Tea, Rose; Green and White. **$1.65 to $2.65 set**

Gift Lingerie Silk Sets

Fine Rayon Silk, flat knit and cord fabric. Pantie, Bloomer and Vest sets. Pastel colors. **$1.50 and $1.75**

Silk Pyjamas

Rayon and Crepe-de-chine, one and two-piece styles. Lovely shades and pastel colors. **$2.50 to $4.50 suit**

Silk Night Gowns

Rayon silk and Crepe-de-chine. Tailored and lace trimmed. Pastel shades. **$1.50 to $3.50**

Gift Hosiery---Pure Silk

Full fashioned, service, Crepe and Mystery Chiffon. Lovely shades for winter. **$1.00 $1.25 $1.50 $1.95 pair**

Gift Handkerchiefs

Dainty handkerchiefs in white and colored lawns and linen. Lace edge and embroidery work. **Xmas boxed--29c. to $1.00**

Gift Scarfs

Crepe-de-chine and gaily printed scarfs. Modern designs, richly blended shades of brown, green, blue, wine and red. **95c. to $1.95 each**

Gift Scarfs

Wool and Scotch plaid scarfs. A large assortment of colors. **75c. and $1.95 each**

Gift Purses

Velvet, Suede, Moire and Leather. Black, brown and red. **$1.00 to $3.95 each**

Men's Wear Department

"Prices Are Slashed" On All Winter Underwear

Buy yours today!

Heavy fleece-lined **Combinations $1.19**

Pure Wool, 100 p.c. Tiger Brand Combinations. **$2.69 suit**

Verquin Gets the Decision Over Clayton at Rimbey

Fans from all over Central Alberta and as far away as Brant, High River and Calgary attended the big boxing match here last Friday night. The main bout was a surprise to many fans who had expected to see Verquin walk off with the fight. D'Arcy Clayton who had 6 lbs. of weight over the Frenchman carried the fight, but not having the ring experience his opponent was able to dodge and lead in an effort to play Clayton out. The first and last rounds of the ten round match went to Clayton, while rounds 2-3-4-5 were Verquin's, the other four were a draw. Clayton started in at a fast pace, and his backers were nervous about his holding out at that pace. Verquin went to his knee in the first round, but was up in a flash. This was the only time either fighter went down in the fight.

Semi Wind-Up of Rimbey's Boxing card was a real exhibition in itself. Many fans proclaimed it worth double the price of admission. Don Wells of Red Deer, at 130 lbs., gave away 22 lbs. in weight to Jimmy Lynch of Calgary. The examining doctor pronounced them both 100 per cent. fit and in the pink of condition. There were six rounds and they all went to Wells. Although Lynch the fighting Irishman took a lot of punishment he handed out some hefty lefts and rights himself.

In the first preliminary Wm. Thompson of Leedale, weight 149 lbs. met Bill Farrell of Lacombe, weight 133 lbs., in four two minute rounds. The decision was a draw. Mr. J. LaFrance and Mr. Walter Wells both of Red Deer were the judges. Mr. Pete Holm referee.

In the second preliminary Mike Clancy of Seattle weight 128 lbs., fought four two minutes rounds with Kid McInnis of Calgary, weight 126. These two borers were in the best of condition and went into the fight with a spirit that brought the crowd of enthusiastic fans to its feet. In the first round McInnis swung and came near going over Clancy's back. This bout was also a draw and as pretty an exhibition of boxing as was ever on a card. It also was worth the price of admission.

Pete Holm refereed all the matches and did so in a most fair and impartial manner. Walter Wells, Joe LaFrance, and Art MacDonald acted as judges.

All fans present were loud in their praise of this fight card, and report it as one of the best they had ever witnessed.

CAN YOU BEAT THIS?

A sow belonging to S. Street, who lives west of town had a litter of 16 pigs. These fifteen pigs were marketed at the age of six months and one week and the total weight of the fifteen amounted to 3170 lbs. They were sold through the Hillsdman Valley Pool and graded 11 selects and 4 bacons. Mr. Street is justly proud of this accomplishment.

CALGARY BEER

"The Beer with A Reputation"

The real old-time West with its Cow Punchers--Round-ups--Indians and Buffalo, is only complete when you include CALGARY BEER. It is the real old-time Western beverage, here when the prairies were known as the "North-West Territories"--and its high quality has always been maintained.
